McFarlane said to have met Hamadei, page 2

### Iraq reports naval battle

BAHRAIN (R) - Iraq said its navy intercepted several Iranian vessels in the northern Gulf on Sunday and sunk one of them, while Tehran reported air attacks against Iraqi positions on the southern ground front. An Iraqi high command communique did not identify the Iranian vessel sunk in the engagement, but said the other ships fled. A Tehran war communique, carried by the national news agency IRNA, said Iranian jets pounded Iraqi positions near the southern Iraqi city of Basra and returned to base. Iran launched a cross-border drive towards Basra, Iraq's second city, on Jan. 9, since when many thousands of casualties have been reported on both sides in fierce battles. Iraq said its forces southeast of Basra continued heavy artillery, tank and mortar shelling of Iranian positions. Iraq, which bas reported almost daily air raids on targets in Iranian towns and cities since Jan. 9, did not report any air action on Sunday, probably

### Gorbachev to make new proposals

WASHINGTON (AP) - Soviet leader Mikhail S. Gorbachev will deliver a speech on arms control next weekend in which he is expected to suggest new ideas aimed at reaching an agreement with the United States, according. to CBS News. The network, quoting unidentified sources in the administration of President Ronald Reagan, said Soviet Deputy Foreign Minister Yuli Vorontsov, Moscow's chief negotiator at the arms talks in Geneva, recently told U.S. negotiator Max M. Kampelman of Mr. Gor-bachev's planned address. Administration officials have been led to believe the speech will contain "new ideas aimed at achieving a major arms control agreement, the network said.

#### Iran said ready to free Egyptian PoWs

ABU DHABI (R) - Iran has agreed to free Egyptian prisoners captured fighting for Iraq, Sudanese Foreign Minister Sharif Hindi was reported on Sunday as saying. The United Arah Emirates (UAE) daily Al Ittihad quoted him as saying in an interview in Khartoum that he had discussed the matter with Iranian officials and Iran had agreed to release the Egyptians in batches, starting this month. He did not say when the talks took place or how many prisoners were in-volved. But the paper quoted diplomatic sources as saying Iran held 13,000 Egyptians and would release 5,000 this month.

### India begins troop pullout

NEW DELHI (AP) — The Indian army started pulling out 60,000 troops from the border with Pakistan in Jammu and Kashmir state Saturday in consonance with an agreement signed Wednesday. The United News of India, quoting an unidentified spokesman, said the pullout was limited to the northern Jammn and Kashmir state and will be completed Feb. 19.

### Bomb hurled at Syrian mission in Brussels

BRUSSELS (R) - A petrol bomh was thrown through a window of the Syrian embassy in Brussels Saturday night but did not explode, Brussels police said Sunday. A man called the Belgian news agency Belga Saturday night claiming responsibility, saying the act was meant as "revenge for the Palestinian people against the regime of (Syrian President Hafez Al) Assad which is carrying out the annihilation of Palestinian refugees in the Shatila and Bourj Al Barajneh camps (in Lebanon)." Police said the only damage to the embassy was a broken first floor window.

### Canadian engineer released in Tehran

ST CATHARINES, Ontario (AP) - Canadian engineer Philip Engs, arrested in Iran last Dec. 2 on espionage charges, was re-leased Sunday from a jail and is staying at a Tehran house, a government spokesman was quoted as saying. External affairs spokesman Georges Delanoe told Broadcast News that Mr. Engs' release was confirmed by the Danish ambassador in Tehran, who is acting on Canada's behalf. "Mr. Engs has been released at 1:30 p.m. Tehran time. He looks fine, in very good condition," Delanoe said.

## Kidnappers step up pressure with fresh ultimatum to Israel

Peres rejects new warning and opts for quiet diplomacy with Berri's offer

Combined agency dispatches

BEIRUT — An underground group stepped up pressure on Israel on Sunday by issuing a fresh ultimatum to the Jewish state to release 400 Arab prisoners but the Israeli foreign minister rejected the ultimatum.

mic Jihad for the Liberation of suggestion, please approach Palestine, in the name of its four Israel in an orderly way." Palestine, in the name of its four captives - three Americans and an Indian with residence status in the U.S. - warned Israel that the four would be killed unless 400 Arab prisoners held in Israeli detention camps were freed by Monday. The letter, handwritten in bad English, was read out in an accompanying 10-minute video film delivered to an international news agency in Beirut.

Apparently in response to the ultimatum, the Israeli foreign minister, Shimon Peres, told Israeli army radio: "Israel cannot and will not operate according to

Weinberger

LONDON (Agencies) — U.S. Defence Secretary Caspar Weinberger denied on Sunday

that the United States was plan-

ning a military strike to aid hos-

tages held in Lebanon.

Mr. Peres also referred to an offer by Lebanese Justice Minister Nabih Berri, leader of the Shi'ite Amal militia, to free an Israeli airman held by Amal since late last year in exchange for the four American hostages and the 400 detainees sought by the Islamie Jihad for the Liberation of

Mr. Peres said Mr. Berri's proposal, announced to reporters in Damascus, was not made through proper channels.
"I saw (Mr. Berri) in a public that should not be conducted publicly or through the media," Mr. Peres said.

Mr. Peres gave no indication Israeli leaders were prepared to move from their position of refusing to exchange jailed detainees for hostages in Lebanon.

In the video tape released in Beirut, one of the four kidnapped lecturers, American Alan Steen, said that if the Arab prisoners are not released, "our fate will be execution."

"Feh. 9 is the last date to release them," said the five-page letter, read out by Prof. Steen. "Just a reminder: Goofing around will be useless."

Prof. Steen, together with pro-fessors Robert Polhill, Jesse Turner and Mithileshwar Singh, were abducted on Jan. 24. Their captors have also warned the men face "execution" in the

event of any U.S. military in-The "goofing around" referred

## appearance and there are things Speculation mounts over Waite's fate

tion quickened in Beirut on Sou-day over the fate of missing Brit-ish church envoy Terry Waite and captives — including seven police and militia officials told Reuters they still had no news of the 47-year-old Anglican lay aide despite radio and newspaper reports that he had already been freed by the captors of foreign hostages the burly Briton had sought to free.

In Damascus of Saturday. Shi'ite Muslim Amal militia chief Nabih Berri said he expected Mr. Waite to be released very soon. In a hizarre twist to the mount-

ing hostage crisis, a statement from the Revolutionary Justice Organisation charged Mr. Waite with having concealed a transmitter device in his body. The handwritten statement, together with a colour photo-

graph of American kidnap victim Edward Austin Tracy, was delivered Saturday night to Beirut's independent An Nahar newspaper.
"Some places where hostages

are believed to be and where Terry Waite is, were spotted by means a transmitter put in his (Mr. Waite's) body," the statement said.

Mr. Tracy, shown smiling and apparently in good health, is one of eight U.S. nationals believed held hostage in Lebanon. He was seized in west Beirut last Oct. 21. The "Revolutionary Justice

BEIRUT (Agencies) - Specula- Organisation" is one of three Americans - if the United States intervenes militarily in the re-

> Lebanon.
>
> The targets for the attack, code-named "Operation Raven," have been pinned by a "signalsending wireless detector fitted on Mr. Waite's body," the state-

ment said. The statement claimed U.S. Marines would land at the seaside Ramlet Al Baida district while U.S. paratroopers would drop at the old residential quarter of Basta under cover from low-flying

Israeli jets. It said U.S. warplanes would simultaneously attack Hizbollah bases in east Lebanon's Syriancontrolled Bekka Valley as the

Beirut intervention is under way. The statement accused the predominantly Christian command of the Lebanese army of "collaborating with the Americans."
It said U.S. President Ronald Reagan's administration was trying to talk Britain and France into backing the operation.

## U.S. is not ready for SDI deployment decision

WASHINGTON (AP) - De- could lead to deployment by fence Secretary Caspar Weinber- 1994. ger said Sunday the first phase of a "Star Wars" anti-missile shield could be deployed "somewhere in the 1993-1994 range," but that the United States was not ready yet to make that decision.

The secretary, in an interview broadcast by the British Broadcasting Corporation, also stressed the United States would abide by the terms of the Anti-Ballistic Missile treaty before actually deploying any part of the "Star Wars" system.

The treaty provides for amendments of withdrawal "and everybody agrees that when we're ready to deploy, we would have to take advantage of the provisions of lihe ABM treaty," Mr. Weinberger said.

The secretary, during congressional hearings last week, said the Pentagon was "close to being able to recommend deployment decisions" for "Star Wars" to President Ronald Reagan. He said he hoped a presidential decision

In the BBC interview, Mr. Weinberger elaborated on those remarks, saying he had always backed the idea of a phased deployment starting as soon as possible.

"We would want to put in a first phase that we would want to be a totally operable part and a totally integral part of the whole-system," he said.

"And then we would want to have a second phase. It's roughly the equivalent to putting in the foundations, the walls and then the roof, so to speak. We've had some estimates that it could be somewhere in the 1993-1994

Two or three years ago, people were talking about the year 2000. That's just an indication of how much more progress we've made on the research programme," he said.

Dole blasts Nunn's warning on SDI, page 8

## 'Camps war' toll rises to 545 dead in 11

weeks BEIRUT (Agencies) — Heavy fighting raged between Palesti-

nian fighters and Lebanese Shi'ite Amal militiamen on Sunday around two battered refugee camps in Beirut. Police said nine people were killed and 41 wounded.

Shell hlasts reverberated across the city as the antagonists battled with tanks, bowitzers and mortars for a second straight day at the shantytowns of Shatila and Bourj Al Barajneb.

The new casualties boosted the two-day toll to 15 killed and 68 injured.

Militiamen of Justice Minister Nabih Berri's Amal movement fired their automatic rifles into the air to make way for racing ambulances through trafficsnarled streets to hospitals.

Police said Amal forces hammered the two camps with sustained cannon barrages from Soviet-made T-54 tanks and U.S.-made M-48 tanks. Palestinian gunners based in

the central Lebanese mountains above Beirut responded with long-range artillery bombardment on Shi'ite slums surrounding the camps, police said. Radio Beirut interrupted its

programmes at noon to report... that the predominantly Shi'ite suburbs of Haret Hreik, Rweiss and Bajour were coming under "shell fire from Palestinian batteries in the mountains."

Each side accused the other of willing the new fighting An Amal communique warned the population of southern Beirut to stay indoors, "because there is an attempt by the Palestinians to escalate the confrontation."

Communiques from the Palestine Liberation Organisation accused Amal of renewing its attempts to storm Shatila and Bourj Al Barajneh.

The new casualties upped to 545 killed and 1,430 wounded the overall toll from the Amal-PLO fighting in Beirut and South Lebanon 11 weeks ago.

Sunday's clashes erupted despite an announcement by Amal that it planned to lift its siege of Rashidiyeh Palestinian refugee camp near the southern Lebanese port of Tyre, blockaded since Sept. 30.

Amal said it was to ease its siege of Rashidiyeh on Sunday and allow evacuation of wounded.

In a statement, Amal said it would allow emergency food and medical supplies to be delivered to the camps' 22,000 refugees every day between 0700 GMT and 1200 GMT.

There was no immediate word on whether any wounded had been taken ont of the camp on

Sunday. Reports from Rashidiyeh and the two Beirut camps speak of widespread hunger and suffering

arising from Amal's tactics. Foreign medical workers in Bourj Al Barajneh said on Saturday conditions there had become unbearable after 14 weeks

of siege.

A message from the team, led by British surgeon Pauline Cutting, said: "People here are starving. We have seen children searching through garbage cans. A woman was shot today while trying to cut grass to feed ber children. Some people have begun to eat cats and dogs to survive."

Last week, Bouri Al Baraineh refugees asked Muslim religious leaders for permission to eat human flesh. The Tyre statement followed a

meeting between Amal officials and Iranian diplomat Mohammad Hassan Satari.

Iran mediated truce arrangements for an end to the "camps war" late last year, but they have not yet brought peace.

Amal leader Berri, resident in Palestinian unity.

Damascus for the past few months, said on Saturday he hoped a new peace move could be implemented to end what he called "this black chapter."

## Cabinet studies action to boost customs duties and cut spending

By Rana Sabbagh Jordan Times Staff Reporter

AMMAN — A meeting continued at the Prime Ministry on Sunday to discuss measures related to a series of Cabinet decisions adopted on Saturday targeted at controlling recurrent public expenditures and increasing revenues from custom duties.

The Jordan Times learnt that the meeting, chaired by Prime Minister Zaid Rifai and attended by several ministers, was apparently dwelling on the decisions to raise production fees on local industrial products, increase import duties on several commodities and eurh public fees on each tonne of reinforced spending.

The measures, which were carried mexplained by the Jordan News Agency, Petra, on Saturday evening, drew mixed reactions ranging from criticism to indifference hy industrialists and husinessmen who were interviewed by the Jordan Times on Sunday.

The government's decisions raised import duties on cigarettes, ready-made wear and alcobolie beverages, and increased production fees on locally-produced reinforced iron bars and white cement.

A Cabinet statement, carried by Petra, said these measures were taken to support the national economy, and that further measures were under consideration to impose tighter control on current public expenditure. The Cabinet communique gave no percentages of the increases nor did it mention means to control public spending.

Rajai Mnasher, minister of trade, industry and supply, refused comment, but Custom's Department Director Adel Al Qudah said that custom duties on ready-made clothes would increase by 10 per cent. Interviewed over the phone at his house, he said be did not have the present figures of duties charged on these two commodities nor on JD 16 million during the first the imports of cigarettes, cigar eight months of 1986, a CBJ

and tobacco which were affected by the decision.

Meanwhile, leading hrands of imported alcoholic beverages and cigarettes appear to have disappeared from the shelves of Amman shops in anticipation of the rise in customs duties which will make them costlier.

Jordan, during the first eight months of 1986, spent a total of JD 4.73 million on beverage and tobacco imports, according to Central Bank of Jordan (CBJ) figures. There is no split figures for the two items since they are classified under the same title. Mr. Qudah said that a sum of

JD 5 was added as production iron bars, presently sold at JD 135 per tonne. There are three local steel and iron plants which were given protection measures earlier

"Our volume of sales will not be affected by such a decision," said an owner of one of the firms. "If anything, these measures will affect the pockets of the Jordanians who have no choice but to purchase local reinforced iron bars," he said. He spoke to

the Jordan Times on condition of anonymity. He said that the government was "trying to compensate for public revenues (custom duties) which were derived from iron imports prior to granting the local industries protection against foreign competition." More than a year ago, the government granted these three companies protection and banned the imports of reinforced iron bars. People dealing

local production was of excellent quality. The measures also stipulated that local ready-to-wear industries would be granted protection measures such as lowering or from customs duties and increasing taxes on similar imported foreign ready-made clothes.

with these three factories said the

Jordan's total imports of shoes and ready-made clothes reached

Although the majority of owners of local clothes industries strongly welcomed the decision, owners of import-oriented boutiques criticised the measures charging their volume of sales will be sharply reduced.

At present, we are paying 60 per cent on the total volume of imported clothes. With this measure, our custom duty payments will increase to 70 per cent, directly affecting our price structures and reducing our sales,' said the owner of a well-known fashion house who wished his name be not mentioned. "Now the customer will think twice be-

fore he buys any garment."

The Cabinet communique on Saturday did not say when these newly measures would be en-

forced. A senior Jordanian official has praised the local ready-to-wear industries and foresaw that protection measures would be imposed soon to allow the sector competitiveness with similar imported products. The number of these local factories was not

known but it is said to exceed 40. The production fees increase on white cement was put by Mr. Qudah as JD 7.200 per tonne. No company official was available on Sunday to comment on the present market price of white ce-

Three veteran industrialists, interviewed by the Jordan Tunes, praised the measures to protect the local ready-to-wear industry from foreign competition. However, they said strict mea-sures should be enforced to assure their quality did not drop.

The three, who spoke on condition of anonymity, said they did not oppose the idea luxury items. They said that such a measure might be conducive to encourage Jordanians from quitting smoking or reducing their consumption of

Jordan last raised import duties on these two commodities on Dec. 28, 1985, when it increased

## Kuwaiti police arrest one of 5 suspected saboteurs

KUWAIT (Agencies) - Kuwait said Sunday it had arrested one of five men sought for sabotage at key oil sites in June 1986 and January this year, for which 11

men are already in detention.
Interior Minister Sheikh Nawaf Al Ahmad Al Sabab informed Sunday's routine weekly cabinet meeting of the arrest, Minister of State for Cabinet Affairs Rashid Al Rashid told reporters.

The authorities have named all 16 accused of the bomhings at group. offshore and onshore oil sites in June 1986 and last month but identified only four by nationality, as Kuwaitis.

Diplomats say the names indicated all of them were Kuwaitis, with several coming from families of Iranian origin.

The crown prince and prime minister, Sheikh Saad Al Abdulla Al Sabah, vowed Saturday night that would allow no interference in its affairs

"Some believed that a bomb government of Kuwait to alert its policy and yeild to blackmail." he said. "Whatever happens, we will commanders that "we wished never bend to such hlackmail nor Iran to have attended so as to put will we alter our policy."

No formal charges bave been announced yet and no trial date made public. Sheikh Saad said the 11 men detained last month had confessed.

Kuwait has been hit by several bombings in recent years, some of which - including a failed car-bomb attempt on the life of the emir, Sheikh Jaber Al Ahmad Al Sabah, in May 1985 - were claimed in Lebanon hy the pro-Iranian Islamic Jihad (holy war)

Islamic Jihad has listed freedom for 17 Arabs jailed in Kuwait for blasts in 1983 as part of its price for releasing American and French hostages it holds. Kuwait has said Iran, which resents Kuwaiti hacking for its war foe Iraq, was connected with

Sheikh Saad warned on Saturday that other acts of sabotage were still to be expected in the Gulf state.

the 1983 blasts.

"Some believed that a bomb Sheikh Saad, reviewing here or there would coerce the Kuwaiti attempts to convince Iran to attend the Jan. 26-30 Islamic conference, told the army

## Israel jails 3 Arabs for life

TEL AVIV (Agencies) — Three Palestinians were sentenced to life in prison on Sunday for allegedly carrying out a grenade attack on Israeli soldiers near the western wall in Jerusalem last October.

One Israeli soldier was killed and 69 others wounded in the attack that occurred on Oct. 15 during a swearing-in ceremony for new soldiers. The attack was claimed by a

group calling itself Jihad Islami. Although the name is usually associated with pro-Iranian groups in Lebanon, Israeli authorities said the perpetrators belonged to the Palestinian group A three-member military tri-

bunal handed down life sentences

to Nasser Daoud Mustapha Khalifa 28, his brother Tarek, 20, and Ibrahim Alian, 22. All are from Silwan, a village near Jerusalem. The court ruled a fourth defendant, 36-year-old Suliman Khalifa, a brother of Nasser and

Tarek. would stand trial separately. He is accused of belonging to Fateh but not of participating in the attack. No date was set. Defence lawyer Mohammad

Kawan pointed out that the three acted for ideological reasons and attacked a military target. The president of the court cut

short the statement and contended that the defendants had thoroughly planned their attack.

The three defendants wore manacles on their hands and feet during the trial. Handcuffs were removed only when they appeared in the witness box.

Meanwhile, Israel announced on Sunday the arrest of an imspecified number of Palestinians accused of belonging to two guerrilla groups responsible for fire-bomb attacks on Israeli buses in the occupied West Bank.

## Chad reports increased Libyan presence in north

'N'DJAMENA, Chad (Agencies) — Libya has sent students and other civilians to augment its military forces in northern Chad, N'Djamena Radio reported Sunday.

The radio said Libvan forces in northern Chad had been doubled to about 20,000 in the past few days after suffering setbacks in battles with Chadian government

Libvan students and members of grassroots People's Committees had been flown to the Libyan-controlled airstrip in Quadi Doum, the report said.

Libvan forces had laid mines along a 750-kilometre stretch of the Chad-Niger border, had poisoned wells and were killing people and animals in the region, the radio added.

There was no independent confirmation of the Chadian claims.

In another development, Chadian radio reported the return to N'Djamena Saturday of former Chadian rebel leaders Achen Daoud and Col. Wadel Abdul Kader Kamogue. The two men formerly headed rebel factions opposed to the N'Djamena government of President Hissene

Mr. Habre's French-backed troops have been fighting Libyanbacked opposition forces for control of northern Chad. Late last year, troops loyal to Mr. Hahre's major opponent, rebel leader Goukouni Oueddei, rallied to the N'Djamena government and turned against their former Libyan allies.

A number of smaller Chadian opposition factions have also joined forces with the Hahre government in recent months.

Chad said Saturday its forces Friday beat off a Libyan attack on a key government-held outpost in the mountains of north western

N'Djamena Radio quoted a statement from the military high command as saying 19 Lihyan soldiers were killed and 18 captured at Zouar, a strategic oasis located on the edge of the Ennedi Mountain Range.

Two Chadian soldiers were slightly injured during cleaning up operations to dislodge Libyan troops backing Chad rebels battling the N'Djamena government, the statement said.

Zouar, which controls the main supply route leading to rear hases in southern Lihva. has heen the scene of intermittent fighting for the past five weeks.

On Friday Chad reported Lihvan air raids on the outpost. kilometres N'Djamena.

The outpost, surrounded by rocky cliffs providing easy shelter for Chad's hardened fighters, has been the target of frequent bombing since it was seized by government forces on Jan. 21.

Saturday's statement said two Soviet-made-T-55 tanks and assorted military vehicles were also destroyed by the Chadian

On Friday France announced it was redeploying its 1,400-man deterrent force backing the N'Djamena government further north following reports of a ma-jor build-up of Libyan troops in northern Chad.

## McFarlane reportedly met with Hamadei

HAMBURG. West Germany (AP) — West Germany's Spiegel magazine says former U.S. national security adviser Robert McFarlane met in Lebanon last year with a suspected hijacker now jailed in Frankfurt, but did not know the man's true identity.

Citing unidentified U.S. security officials, Spiegel said in a brief report released Saturday that Mr. McFarlane met with Lehanese suspect Mohammad Ali Hamadei while on a secret mission to Beirut to try to negotiate the release of American hostages held in Lebanon.

The magazine said the meeting took place during 1986, but gave no further details. It emphasised that Mr. McFarlane did not know of Hamadei's true identity when the two allegedly met.

In Washington, State Department officials said they didn't know anything about a McFarlane-Hamadei meeting and Mr. McFarlane could not be reached for comment.

Hamadei was arrested at the Frankfurt airport on Jan. 13 after

Robert McFarlane

arriving in West Germany on a flight from Beirut.

America has officially asked for his extradition to the United States, where he is wanted for air piracy in connection with the June 1985 hijacking of a TWA ictliner

Spiegel also said the federal government has informed U.S. officials that Hamadei will not be extradited, but it did not give any attribution for that report or further details.

No Justice Ministry officials were available Saturday night in Bonn, the federal capital, to comment on the Spiegel report.

Bonn officials have repeatedly

refused to answer any questions about Hamadei's extradition. however, citing a news hlackout on the case imposed last month.

## Iraqi air superiority unaffected despite U.S. missiles used by Iran

By John Owen-Davies

BAHRAIN - U.S. missiles supplied to Iran in an arms-forhostages deal have knocked out a substantial number of Iraqi planes and tanks in the latest flare-up in the Gulf war, regional aviation sources say.

They say U.S. Hawk anti-air-

craft missiles and Tow anti-tank missiles have been a big factor in heavy losses suffered by Iraq since Iran mounted a major offensive on Jan. 9 to try to break the stalemate in the 61/2-year-old

The sources estimate the Iranians have downed about 40 Iraqi aircraft in the past mouth, though they have not seriously affected Baghdad's overwhelming superiority in the skies.

The Iranians have also destroved scores of Iraq's Sovietmade battle tanks, mainly with the wire-guided Tow missiles fired from helicopters, the sources say.

"Washington, Moscow, Paris, are watching closely. The war has become an operational testing ground for a variety of offensive and defensive weapons systems," one source said.

The war pits Iraq's forces, armed largely with Soviet and French weaponry, against an Iranian side equipped mainly with U.S. arms supplied before the 1979 Islamic revolution toppled

WASHINGTON (AP) — An

Israeli official involved in the

secret sale of U.S. arms to Iran

last July that "we are dealing with

the most radical elements" in

elements) can deliver and the

the pro-American Shah.

The United States admitted late last year it sent new arms shipments to Iran in a hid to improve relations with Tehran and win freedom for American hostages held by pro-Iranian groups in Lebanon.

The deal blew up into the worst scandal for President Ronald Reagan in six years in the White House and was criticised by most Arah governments which support

Iraq in the war.
U.S. officials said they shipped 2,008 Tow missiles and more than 500 ground-to-air Hawk missiles to Tehran.

Hashemi Rafsanjani, tolni reporters last month: "Of course we American weapons as well as the old ones we had."

Iran has so far claimed shooting down 38 Iraqi aircraft. Iraq has conceded losing only 12. Aviation sources put the actual losses at less than half the Iranian

figure — about 30 French Mirage F-1 fighters and Soviet MiGs and around 10 helicopters, mostly the Soviet-made MI-24 "Hind" attack craft which Moscow uses in Afghanistan.

The sources say a number of the downed Iraqi jets had been equipped with either "chaff" or flare" anti-missile systems.

Israeli aide told Bush of dealings

The sources said Iraq showed new interest in anti-missile sys- planes.

fighting over the southern Fao peninsula occupied by Iran in

February last year. Tehran claimed up to 100 Iraqi aircraft shot down. But the sources put the figure at about 35. mainly helicopters brought down

with U.S. missiles supplied pre-Iran has deployed most of its anti-aircraft missiles near major ground war zones along the 1,100-kilometre common border and around strategie areas such as its Kharg Island oil terminal in the northern Gulf.

This has left many Iranian town The influential speaker of and cities vulnerable to high-Iran's parliament, Ali Akhar flying bombing raids. Some have only anti-aircraft guns for protection and Iranian leaders have have to admit that we use these been urging residents to build more air raid shelters as the conflict turns increasingly into "a war of the cities

Iran says some 3,000 people have been killed in intensive air strikes on about 30 towns and cities since Tehran launched its drive on the southern Iraqi city of Basra last month.

The Iraqi aircraft losses have not diminished the scale of air raids od Iran.

The London-based International Institute for Strategic Studies (IISS) before the latest offensive listed Iraq's air force strength at some 500 combat

## Greeks, Turks remain sharply divided over Cyprus settlement

Associated Press

NICOSIA, Cyprus (AP) - Nearly 13 years ago Turkey invaded Cyprus, saying it was rescuing the Turkish Cypriot minority from Greek persecution. Today the island's two communities, once mingled, remain partitioned and far from any settlement. A large force of Turkish sol-

diers — seen as protectors by the Turkish Cypriots but as an occupation force by the Greek Cypriots — appear to be in place for a long stay in the northern third of the island. "We'll livet side by side with

Greek Cypriots. But to live together? Never again," said a Turkish Cypriot tourist guide, who gave his name only as

"Never again," in fact, has become the slogan of the 153,000member Turkish Cypriot community that shares the island with 500.000 Greek Cypriots.

The Greek Cypriots in the south have refused to consider a United Nations proposal for a federated government with the Turkish Republic of Northern troops must first leave their 1,609-square kilometre enclave.

Rauf Denktash, the Turkish Cypriot leader, has stepped up efforts to win recognition abroad for his republic. But the United Nations has branded it illegal and so far only Turkey recognises it.

This diplomatic isolation has deprived Northern Cyprus of international aid, access to export

markets and reduced tourism to almost zero, although it remains the main source of revenue for the prosperous south.

Only Turkish planes fly into the Ercan Airport in the Turkish Cypriot zone just outside Nicosia and few ships risk being banned from busy Greek Cypriot ports by docking in northern ports. Most exports are shipped via Turkey, delaying delivery and raising

Turkey helps with an annual \$40 million in subsidies.

Greek Cypriots refuse to issue passports to Turkish Cypriots in the north. Turkish Cypriot travellers must seek temporary travel documents from Ankara, Turkey's capital.

While acknowledging the difficulties Mr. Denktash a 63-yearold British-trained lawyer, insists that the alternative is even worse.

"These people in the south don't want a peace settlement," be said in an interview with the Associated Press at his home in the Turkish Cypriot sector of

"That regime (Greek Cyprus) has been fighting us to take away our rights. Our people have given

Turkish Cypriots say that hundreds of them were massacred and thousands chased out of 103 villages in the south in the 11 years before Turkey's invasion.

Greek Cypriots complain that 200,000 of their people were forced to flee homes and husinesses in the north because of the invasion. They claim Turkish

troops and Turkish Cypriot fighters committed atrocities against Greek Cypriots during the invasion and that hundreds are still unaccounted for, presumed slain.

The Turks invaded days after an abortive coup in Nicosia aimed at union with Greece. "We've existed in Cyprus for 400 years," said Mr. Denktash.

"They cannot be allowed, and shall not be allowed, to become part of Greece." He said the only settlement could be on the basis of equality for both communities, "a partnership government — a bizonal.

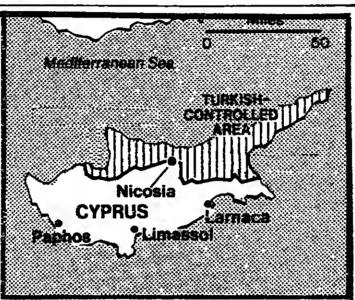

bicommunal federation. Posters of weeping women carrying bahies and running away from gunfire, bloodied bodies of children and hurned houses decorate the walls of many shops and government huildings in the Tur-kish zone. All carry the slogan:

"Never again." Visitors to Turkish Cyprus are urged to see "the Museum of Barbarism," a house where the wife of a Turkish officer and her three infant children were allegedly stabbed to death in a bathtuh where they were hiding from Greek Cyptiots.

ns, overturned lanks: and chairs and torn curtains have been preserved.

The museum is on the Turkish side of the green line that divides Nicosia - so named because a British officer drew up the map splitting the island in two with a

green marker pen. The north and south are linked

U.N. soldiers peering out of the Ledra Palace Hotel.

The hotel, ouce one of the most luxurious in the Middle East, is now a base for the 2,300member U.N. peacekeeping force which guards the line. The once colourful rose garden isovergrown with weeds.

Foreigners are allowed to cross

the green line from south to north hut only for the day. Foreigners who enter Turkish-controlled Cyprus are not allowed to cross into the south and no Cypriot can cross the line in either direction.

But the difference between the two sectors of the east Mediterranean island of 665,000 is striking.

## Kyprianou joins protesters

border dividing Turkish and Greek Cypriots, spotlighting a new controversy over Turkish Cypriot use of hotels in the former resort area of Varosha. The issue complicated the work of U.N. mediators who visited Cyprus last week to explore the potential for progress in reuniting

the divided island. by a 90-metre crossing, a two-minute walk under the gaze of strip of fun-in-the-sun hotels

NICOSIA, Cyprus (AP) - Presi- along a hroad sand beach, has dent Spyros Kyprianou Sunday been deserted no mans land since took part in a protest at the Turks invaded Cyprus in 1974 tollowing a coup d'état aimed at uniting the island with Greece. Varosha is just south of Turkishcontrolled Famagusta.

Mr. Kyprianou and other Greek Cypriot political leaders joined a group of Greek Cypriot women at the dividing line near Famagusta. They made speeches protesting the Turkish invasion which forced some 200,000 Greek Cypriots from their homes-

#### with Iranian radicals, report says Mark Weinberg, a White House spokesman, said Saturday "all the material referred to was given to the Senate Intelligence Committee. The committee did not reach the same conclusion as the Post.

Iran, the Washington Post reported in Sunday's editions. The newspaper said a top secret memorandum written hy Mr. Bush's chief of staff quotes Israeli official Amiram Nir as saying "we've learned they (the radical on July 29.

moderates can't." Nir also said Iranian officials were trying "to squeeze as much as possible" out of Israel and the United States "as long as they have the assets!' - presumably, the hostages, according to the

President Ronald Reagan bas said the administration dealt with moderates in Iran, hoping to better relations with the country.

Craig T. Fuller, Bush's chief of

staff, wrote the three-page memorandum following Nir's meeting with Mr. Bush in Israel In the memo, Nir was quoted as saying the Israelis "activated

the channel. We gave a front to the operation, provided a physic-al base, provided aircraft." Israel has maintained that it

## **NEWS IN BRIEF**

King condoles Hirokito

AMMAN (J.T.) - Chief Chamberlain Prince Ra'd Ibn Zaid, deputising for His Majesty King Hussein, on Sunday visited the Japanese Embassy chancery in Amman and conveyed His Majesty's condolences on the passing away of Prince Takamat-su, brother of Japanese emperor Hirohito. Prince Takamatsu died last Tuesday at the age of 82.

### Prince Hassan visits warehouses

His Royal Highness Crown Prince Hassan on Sunday visited the headquarters of the Royal warehouses and maintenance corps where he was briefed on their duties. Prince Hassan toured the warehouses, met officers and gave directives on administrative

### Cabinet okays memo with W. Germany

AMMAN (Petra) — The Cahinet has agreed on the exchange of memos between Jordan and West Germany on a project to train employees at the Health Ministry's artificial limbs centre. The Cabinet also approved the nomination of Mr. Hamdi Al Tabbaa' as honorary consul for Djibouti in Jordan. Mr. Tabbaa' is the president of the Federation of Jordanian Chambers of

### Horse breeders review society's activities

AMMAN (Petra) — Her Royal Highness Princess Alia on Sunday chaired a meeting for the administrative board of the Royal Jordanian Society of Horse Breeders. The meeting discussed the services which the society renders to horse breeders and the possibility of the Ministry of Agriculture offering veterinary medicines to horse breeders. The meeting also discussed obtaining statistics from the Ministry of Agricul-ture on the number of horses in the country with a view to drawing up a permanent record of horse breeders who are entitled to benefit from the society's services in the future. The society's administrative board, formed at the beginning of this year, is chaired by Princess Alia.

### Cabinet studies new measures

(Continued from page 1)

15

duties on local cigarettes by be-tween 20 to 30 fils per pack and on imported cigarettes by 50 fils per pack.
Minister of Finance Hanna

Odeh was not available on Sunday for comment on preliminary measures to be adopted to control the estimated JD 585.2 million of current expenditures in the 1987 hudget, but a source very close to the Cabinet meeting said spending on public consumption was likely to be the sector affected seriously.

The source gave the following as possible measures to impose stricter control on current public expenditures:

Cancellation of all overtime allowances, thereby saving an annual amount of JD 2 million. - A review of transport allowances and per diems for officials travelling abroad and a sharp negative impact on the present reduction of the number of officials included in delegations attending foreign events or meetings. The concerned officials have suggested that official delegations make use of Jordanian staff working in embassies abroad.

- Imposition of limits on public purchase of cars, machinery, stationery and furniture. It was suggested that government institutions purchase their furniture from local industries. In other cases, the expertise of vocational centres could be helpful in terms of mending used and damaged furniture. There are also suggestions to adopt a unified hrand of cars to be purchased by the government in order to reduce expenses generated from diversity

tion of energy and fuel by public organisations and departments. Curbs on spending in capital investment projects and increasing public spending in production industries.

- Curbs on all consumption expenditures in general and strict guidelines to purchase local commodities.

Rationalisation of consump

- A reevaluation of the performance of major public investment institutions; those which show promising signs should be supported and others which might pose a hurden on the treasury should be frozen.

However, another senior government official conceded that the government would never take a decision to close down any of the major public companies re-gardless of its profits or losses since such a step would have a psychology over the national economy and unemployment.

- A redefinition of allocations for public banquets and dinner parties. There is no fixed figure

on such spending.

The majority of senior officials and industrialists who were interviewed by the Jordan Times expressed the opinion that if Jordan was contemplating a real reduction of current spending it should not have adverse effects on labourers and employment opportunities.

Jordan's JD 1.018 hillion budget for 1987 aims to bridge its JD 39 million deficit through loans, curbs on public expenditure and improved revenues devised from better collection of

### Kidnappers step up pressure

(Continued from page 1) to U.S. warships still on high alert in the Eastern Mediterranean, despite U.S. officials' attempts to reassure West European states that military action remains an unlikely option.

U.S. Secretary of State George Shultz on Sunday hlamed the citizens of Beirut for what he called a"plague" of abductions in the Lehanese capital.

"The people of Beirut have a responsibility for their own community," he said. "And they are

not exercising it." "I do think that the people of Beirut bave to recognise that what they're doing is ruining themselves. They, in effect, have a plague there and they're isolating themselves from the world,"

Mr. Shultz said, "And the world should isolate them."

Mr. Shultz said the citizens of Beirut "should take control of the situation. It is absolutely not in their interest."

Mr. Shultz appeared on "This Week with David Brinkley" on the U.S. television network ABC. He was responding to a question about the possibility that innocent civilians might be hurt if the U.S. attacked Lebanon.

Mr. Shultz refused to say what the United States may do in response to the threat Sunday issued in Beirut by the Islamic Jihad for the Liberation of Pales-

"We'll respond as the situation merits," Mr. Shultz said. "I'm not going to try to forecast it."

### Corrections

In a front-page story yesterday, the Jordan Times incorrectly reported that Mr. Shafiq Obeidat and his wife had witnessed the assassination of PLO Executive Committee member Fahd Qawasmeh and that Mr. Obeidat attempted to block the assailants' escape. Mr. Obeidat told the Jordan Times yesterday that according to his testimony in the case, neither he nor his wife had seen the perpetrators of Mr. Qawasmeh's murder, nor did they attempt to block their escape. All the couple saw and knew then, Mr. Obeidat said, was that they suddenly sustained injury by a stray builet that penetrated their

car's windshield, but did not actually know what was happening around them. The wrong information was obtained by the Jordan Times and published at the time of Mr. Qawasmeh's murder in 1984, and was reprinted in Sunday's story without further checking. The Jordan Times apologises for this and for any inconvenience the inaccurate report caused Mr. Obeidat

In yesterday's issue of the Jordan Times, it was moorrectly reported that police had seized 400 kilogrammes of hashish hidden in a container unloaded at Aqaba. The amount of hashish seized is in fact 1,400 kilogrammes.

## **Potash** production continues upward climb

AMMAN (Petra) — The Arab Potash Company (APC) last year produced a total of 1.103 million tonnes of potash all of which was exported to different countries via Aqaba, APC Director General Ali Nsour announced Sunday.

He said that APC was established in 1982 and that year produced 14,000 tonnes, rising to 287,000 tonnes in 1983, 486,000 tonnes in 1984 and 908,000 tonnes in 1985. This year APC expects to produce I.4 million tonnes of potash and contracts have been already signed for marketing this year's production, Mr. Nsour continued

He said that Jordan's potash, mined near the southern tip of the Dead Sea, is being exported to India, China, Brazil, France, Malaysia, Indonesia, Taiwan and Japan in addition to Mediterranean countries such as Tunisia, Italy, Turkey and also to Austraha, New Zealand and a number of Latin American nations.

Together with locally-produced phosphates, potash can make some of the best fertilisers used for agriculture and the two prodncts form a basic element in Jordan's national economy, Mr. Nsour pointed ont. He said that the past three years have proved that Jordan's potash is of high quality and capable of competing on international markets with other types from other countries.

#### Increasing demand

He said that he expects a greater demand for Jordan's potash in the coming few years, and for this reason, APC intends to introduce some changes in its plants to increase production to at least I.4 million tonnes annually. The second phase, he said, is designed to boost production to two million tonnes aunually.

### Transit stops

In addition, most of the Indian expatriates living in Jordan and Jordanian students studying in Indian universities are expected to make use of the direct flight, which will eliminate lengthy transit stops in the Gulf. In some of the Gulf states, passengers with Asian origin, notably India, Pakistan, Bangladesh and Sri Lanka, are not allowed transit visas which would allow them to stay overnight in hotels outside the airport.

An Indian expatriate in Jordan commented: "Ît will be a great relief to us if any airline flies direct to Bombay or Delhi. It will alleviate our problems, especially those with small children, of having to spend hours at the transit lounge of a Gulf airport."

On another subject, Mr. Aryne revealed that the widespread belief by layman that aviation fuel was cheap in the oil-producing Gulf states was unfounded. He pointed out that in most Gulf states the price per gallon of aviation fuel ranged between 75 to 80 U.S. cents per gallon, compared with 45 to 52 cents in Europe.

## **Local companies win contracts** for nursing school, health centres and Irbid-Thaghrat Asfour road

AMMAN (Petra) — The government on Sunday awarded contracts worth JD 9.1 million to Baqa'a, the minister said. He said that the road is important since it will link Irbid, the second local contracting firms for the construction of a nursing school in Irbid, 13 medical centres in Irbid and Balqa governorates and to huild the Irhid-Thaghrat

Asfour road near Jerash.

Minister of Public Works Mahmoud Al Hawamdeh signed the contract for the four-lane road which extends 26 kilometres and includes a junction and an island. The minister told a press conference that the 26-kilometre stretch was the first part of a three phase project which will be executed in 23 months at a cost of JD 6.5 million. In the coming months the Ministry of Public Works will start implementing the second and third phases of the project extending from Thaghrat Asfour to Jerash and from Jerash

largest city in Jordan, with the

Health Minister Zaid Hamzeh. who signed the contracts for the nursing school and the medical centres, said that the Irbid nursing school will be a complex for training nurses, complete with residential quarters, lecture balls and that it also includes an institute for paramedics and other facilities. The project is to be built on a 24 dunum area of land that forms part of a 112 dunum plot assigned for huilding the King Abdullah Medical Centre, Dr. Hamzeh added.

He said that the World Bank will partly finance the project which is estimated to cost JD 1.1 million. Work on this project in Irbid, the minister said, will begin

expected to take 20 months to complete.

Referring to the other contracts, he said that they were for constructing 13 medical centres in Irbid and Balqa Governorates and that the project will be carried out by 11 local contracting companies at a cost of JD 1.5

The minister said that the centres will be huilt at the towns of Sarih, Kufr Al Maa, Beit Yaffa, Qamim, Kufr Yoha, Hosha, Sama Al Rousan, Abu Alanda, Al Hadib, Al Zaatari, Ain Al Basha, Al Bashir and Al

He said that the Ministry of Health will in the coming months announce a tender for constructing 25 other health centres in other parts of the country.

## Sultan **Oaboos** receives Khatib

MUSCAT (Petra) — Sultan Qaboos Ibn Sa'id of Oman on Sunday received Information Minister Mohammad Al Khatih who is currently on an official visit to Oman. The meeting was attended by Omani Information Minister Abdul Aziz Al Rawwas and Jordanian Ambassador to Oman Navef Al Hadid.

Also Sunday, Mr. Khatih met Omani Minister of Trade and Industry Salem Ibn Abdullah Al Ghazali. During the meeting the two sides discussed cooperation hetween Jordan and Oman, especially in touristic fields. Also discussed was furnishing Oman with Jordanian expertise in the tour-ism and botel fields and helping Oman in setting up a hotel train-ing institute and training tourist guides. The meeting was attended by the Jordanian ambassador to Oman.

The Jordan Radio and Television Corporation Director General Nasouh Al Majali, who is accompanying Mr. Khatih on the visit, Sunday held talks with senior officials at the Omani radio and television on cooperation between the two countries in the programming and technical fields. They also discussed providing Oman with Jordanian ex-pertise in radio and television production.

## **Divers continue search for** man in Wadi Al Arab dam

vers from the Civil Defence Department (CDD) are still engaged in a search operation for 20-yearold Abdullah Al Rousan from Umm Qais in Irbid Governorate who has been missing since Jan. 30 after last being seen swimming in the Wadi Al Arah reservoir. The reservoir behind the Wadi Al Arah dam is 50 metres deep in some places, according to civil defence director in Irbid, Lieutenant-Colonel Mobammad

According to Lt.-Col. Hmoud, at least 12 skilled divers have been involved in the search for the last 10 days, but as yet there has been no trace of the man and the search will continue.

He said that nearly 12 million cuhic metres of water are stored in the lake at present but noted that the water is muddy and there

water making visibility poor and the search operation more difficult. Civil defence divers have been using ruhber boats and other equipment in their search for the young man hut they are facing the danger of cave-ins and landslides inside the lake itself.

Lt.-Col. Hmoud appealed to the public to refrain from approaching or swimming in the reservoir, and said that his department has already dealt with four other cases of drowning.

Another civil defence officer, Captain Mohammad Sharman, said that the divers now searching for Abdullah Rousan have been able to go down to 35 metres, despite the difficulties, but found nothing. Captain Sharman said he believed that Abdullah had been swimming near the edge of the lake when a landslide occurare shrubs and rocks under the red hurying him under the earth.

## Universities studying computer/video system

By a Jordan Times Staff Reporter

AMMAN — Jordan's higher education institutes are seeking French expertise to introduce computerised video-based teaching programmes to their curricula for training, educational research and communications.

According to Professor Fran-

ois Marchessou from the French Universite de Poitiers, who made an orientation visit to Jordan last week, the University of Jordan and Yarmouk University were contemplating the introduction of high-tech teaching methods for their students. Tentative bases for future cooperation were stay in the Kingdom. Dr. Marchessou, who paid field visits to the two universities, told the Jor-

dan Times before he wound up

his visit that he expected real cooperation between his university and Jordan to commence within the next three months. The French audio-visual sys-

tem, Dr. Marchesson explained, is designed to help lecturers improve students' language proficiency. The new system, which largely depends on microcomputers (software) and the video-disc players, is currently being used in French primary and secondary schools and colleges, said Dr. Marchessou.

He said that the computerisedvideo programmes (connecting the video with a software programme) provide the students with visual programmes associated

with a soundtrack. This method enables teachers to prepare prompt exercises and quizes based on programmes registered on the video cassette and connected to the computer set.

During his stay in Amman, Dr. Marchessou held talks with officials at Jordan Television on prospects for introducing the same system to the French television programmes, he said, adding that Jordan Television was expected to adopt the new methods in the near future. Dr. Marchessou delivered a

lecture on the new languageteaching method at the French cultural centre in Amman last

## Misguided unilateralism

LAST Tuesday was a discouraging day for those of us who would like to see the levels of nuclear armaments lowered and the risks of nuclear confrontation reduced. In its Nevada testing ground, the United States conducted its first nuclear test of 1987. This prompted the Soviet Union to repeat its threat of ending its 18 months nuclear testing moratorium. At the same time in Washington, U.S. Secretary of State George Shultz was informing the U.S. Senate Armed Services Committee that the Reagan administration would not allow the 1972 Anti-Ballistic Missile (ABM) treaty to stop the development and deployment of the Strategic Defence Initiative (SDI).

These are ominous developments not just for East-West relations but also for the safety and well-being of the world community. The nuclear test conducted by the U.S., despite Soviet warnings that such tests would force Moscow to resume its nuclear testing, has thwarted the opportunity of a nuclear test ban treaty, and thereby, the opportunity to restrict the technological component of the arms race.

Secretary Shultz's statement, and reports from Washington that some in the administration want an early deployment of SDI, do not bode well for the longest standing arms control agreement, the ABM treaty. This follows the Reagan administration's decision, a few months ago, to exceed the limits of the SALT II treaty. Such disregard and contempt for previously negotiated treaties is symptomatic of the Reagan administration's attitude towards arms control, President Reagan campaigned against the SALT II treaty in his bid for election in 1980. He then proceeded to appoint officials who shared his views on arms control, Secretary of Defence Caspar Weinberger heing the most obvious example. But, despite its contempt for arms control, the Reagan administration has, until recently, respected the previously negotiated agreements, due primarily to pressure at home and from European allies. Now, it appears that the U.S. administration is bent on rejecting domestic cuinion, the opinion of its European allies, and of the world at large.

The events of last week stem from a bazardous unilateralism on the part of the U.S. administration, both in weapons policy and in foreign policy generally. They are intimately related because continued testing is required not only to modernise the American nuclear arsenal but to test the functioning of the "Star Wars" project. Thus, SDI, the epitome of the Reagan administration's unilateral approach, has thwarted the chance for one treaty, a nuclear test ban, and threatens to destroy another, the ABM treaty. It is well known that SDI is also the main stumbling block for an agreement oo strategic and intermediate-range nuclear arms. And finally, SOI threatens to move the arms race into a whole new dimension of space-based weapons.

These recent steps by the U.S. administration and its determination to pursue the SDI programme look misguided and dangerous. They are bound to increase tensions and propel the arms race into unprecedented levels. We, in the Third World, cannot look on passively or disregard these problems as none of our concern. On the contrary, the daoger of nuclear war threatens the entire world, not just the NATO and Warsaw Pact countries. Therefore, we have to speak out against such a unilateral policy by the U.S. administration. It is the gravst of follies, not only for the possibilities of arms cootrol, but for the peace and security of the world community as a

### ARABIC PRESS EDITORIALS

### Al Ra'i: Israeli piracy

IN the latest acts of piracy committed by Israel, its naval forces seized a vessel in the open sea and detained its occupants and impounded its cargo claiming that it was destined for the Palestinian resistance in Lebanon. At the same time Israel's leaders continue a propaganda campaign against the Arabs and Muslims, claiming that they are responsible for all terrorist activity in the Middle East. Israel's seizure of the civilian vessel was not the first act of piracy it commits in the sea and would not be the last because it is a state that has been conducting organised terrorism against civilians not only at sea but also by land and in the air. Ever since its establishment as a state in occupied Palestine, Israel has been committing acts of piracy like the stealing of French gunboats in France several years ago and the hijacking of the Syrian plane en route to Damascus from Libya. Israel has actually introduced all forms or organised terrorism to the Middle East area, but it continues to blame all acts of terrorism on the Arabs who fall victim every time to Israel's atrocities and criminal actions. For this reason we call on the international community to stand firm in the face of Israel's piracy at sea, in the air and on land; to see to it that all international principles and laws governing free trade remain respected and safeguarded. Ending such criminal actions is a requirement for the establishment of

### Al Dustour: Amal's 'killing camps'

THERE can be no justification whatsoever for the continued shelling by Amal militia of the Palestinian refugee camps in Lebanon. There can be no reasonable cause for the continued siege imposed on the camps and for the killing of tens of thousands of the camps residents in the most brutal manner. The tragedy of the Palestinian refugees is one of the whole Palestinian people and the Arab Nation whose sons are accustomed only to ruise arms in the race of one another. The tragedy of the refugees is being enacted on Lebanon's territory where the warring factions in that country continue to carry out all forms of atrocities against one another and where the Arab Nation does not lift a finger to help end the bloodshed. The attacks on the camps and the on-going strife in Lebanon reflect a true picture of an Arab Nation and Arab reality. In fact, the tragedy of Lebanon and its people reflect the weakness of the Arab Nation, a tragedy that is continually encouraged by forces hostile to the Arabs and Muslims and those that benefit from the death of the Palestinian people. The Arab countries have watched the refugees being killed for the past four months and watched the Lebanese killing one another for the past 12 years without taking meaningful action to stop the tragedy. The silence on the part of the Arah countries is interpreted as condoning the continued bloodshed and a hlessing of the hands that continue to kill the innocent people in the camps.

## Sawt Al Shaab: U.S. gunboat diplomacy

THE Americans still maintain a fleet of war ships and troops off the Lebanese coast ready to get involved in yet another adventure against the Lebanese people. In 1983 the Americans sent their Marines to Beirut and other parts of the Lebanese territory only to lose 250 of their best trained men in seconds during a blast at their headquarters. In retaliation the Americans used their destroyers to shell civilian targets in Lebanon but they failed to terrorise the people of that country or to stop the drive to attack all what is American and detain American hostages on Lebanese soil. The Americans continue to threaten to use force against the Arab people and at the same time continue to pour their support and their military hardware and financial assistance on Israel in total disregard to the Arab Nation. This time, the Americans who wish to land in Lebanon do not realise who their enemies really are and they seem to be chasing ghosts trying to wrest the hostages from their grip. All the American computers have failed to help find a way for locating the place of the hostages so that the Marines could be sent in to save them, and therefore, it is futile for the Americans to remain in the area trying the impossible. Perhaps they are staying in the Lebanesc waters prior to launching an act of vengeance against the Arabs in collusion with their Israeli allies.

## When the time is right for peace

By Dr. Waleed Sa'di

ONE wonders why the Israeli leaders are deliberately sending the Arabs conflicting signals about the idea of holding an international peace conference on the Palestinian conflict. They certainly appear to talk with different tongues; for whereas the Israeli Prime Minister Yitzhak Shamir is assuming the posture of total and categorical rejection of the idea of the said conference, other Israeli leaders including Shimon Peres the deputy prime minister and minister of foreign affairs as well as Mr. Rabin the minister of defence appear to be open minded about the proposal to convene an international peace conference and occasionally appear to be supportive. The pressing question that must be on the mind of all concerned Arab leaders as well as the concerned Arabs in this region of the Arab World must be the following: Are the Israeli leaders truly divided on the issue of the conference and if not are they intentionally engaged in such diplomatic acrobatics?

I suspect that the Israeli leaders are not speaking with different tongues. On the contrary I contend that they speak in a carefully orchestrated way and in concert among themselves. In their minds, they are merely performing pre-determined roles with a view to sow disarray and confusion in the Arab World. Better still, they could be throwing baites in the Arab sea hoping to catch an Arab response which stands to serve their interests the most. The ultimate objective of these Israeli exercises in diplomatic manoeuvering is simply to gain time in order to consolidate even more their hold on the occupied territories and their people. To even contemplate that the Israeli establishment, no matter what its orientation, would voluntarily trade territory for peace is euphoria in the extreme. There is no doubt in my mind that short of collective forceful pressure by the permanent members of the U.N. Security Council, there is no chance that the Israelis would budge on the issue of total withdrawal from the occupied Arab territories including the Arab Jerusalem. But if all this is true why then are the Arab governments falling for this diplomatic manoeuvering and orchestrations and why do they keep on hammering on the point of the imernational conference? Again I suspect that the Arab governments are going along in this direction because simply they have no other viable alternative to pursue at this stage of the political game of the Middle East. I submit the Arab governments must also play for time till other favourable opportunities are created in our region as well as internationally. It would be simply and utterly suicidal for the Arab governments to do nothing and declare that all the political efforts to resolve the Palestinian conflict are simply exercises in futility. The beacon of hope must glow lest despair sets in the psyche of the concerned Arab peoples. And by responding positively to the various international and regional initiatives in the quest for a solution to the Middle East conflict, the Arab World gains respectability, support and good public relations.

On the other hand f think Israel would accept an initiative only if it stands to reap tremendous political and material gains. Accordingly. Israel could be persuaded to accept and attend an international peace conference on the Palestinian conflict if its calculations reveal that it can extricate some tangible objectives such as the acceleration of Jewish migration from the Soviet Union and the extension to her of military, economic and financial support on an even greater scale. But I doubt that Israel would attend such a conference to trade territory for peace. I do not think that such a trade off is on its agenda. It is clear that they intend to simply drivea hard bargain on the subject of convening an international peace conference and when the price is right they will acquiesce reluctantly in preparation for announcing the failure of such a conference coupled with the reminder of "I told you so."

If the foregoing propositions were proven right, where do we in the Arab World go from here? Our viable options appear limited at this stage of Middle Eastern politics, but they could undergo tremendous change and evolution if the Arabs play their cards better and wiser. There is no doubt that in the final analysis the Israeli challenge would require a genuine concerted Arab action. Even in our present collective situation much more can be done to arrive at an honourable and durable resolution of the Palestinian conflict. While admitting our shortcomings we must not lose sight

of our collective strength. With political will and determination the balance of comparable power could be tipped in our favour and all of this could be realised in a relatively short time.

It is well within the reach of the immediate Arab parties to the

conflict to adopt a strategy which aims for the liberation of the occupied territories including East Jerusalem and for the realisation of Palestinian rights. Needless to say, the paramount objective in any Arab strategy at this interim stage should be the frustration of the Israeli designs on the occupied territories and the exposition of Israeli manoeuvering and orchestrations in the politics of the Middle East. To accomplish these objectives there is no escape from the proposition that joint Arab action, especially between the Jordanians and Palestinians, is a sine qua non. Otherwise the Arab parties stand to neutralise one another's strength and bargaining power and in the final analysis reducing the total strength of the Arab side of the equation practically to zero.

Till we on the Arab side can manage to achieve the desired harmony and common sense, we must remain wary of the various Israeli signals to us and treat them for what they truly are. Thus far the Israeli strategy has been to throw a wrench in the various peace processes because the price for them was not quite right. We must likewise make sure that the price for us is equally right and honourable. Time acts both ways for the two sides of the Palestinian conflict: It provides additional time for the Israelis to consolidate their control over the Arab territories; and at the same time sets into motion the acceleration of the time-bomb within its so-called secured borders, a bomb created by the ever-increasing Arab population within those frontiers. Therefore, if there are ways and means to consolidate the Arab presence on the occupied territories as an interim measure, the Arab side need not panic and can likewise play for time. One can already have a vision of the future of Arab territories if all relevant data are accumulated and a sound projection is made for the next few decades and beyond. I think such a future is not that bleak as we sometimes lead ourselves to believe.

## Lange government seems set to win New Zealand election

By Christopher Pritchett Reuter

WELLINGTON - For three years New Zealand's Finance Minister Roger Douglas has ripped apart and restructured the economy, leaving the country of

 3.3 million people reeling.
 New Zealand's record unemployment, high inflation and other economic woes would make most governments quake in an election year.

But Prime Minister David Lange believes his administration's policies will renew the nation's wealth and sweep his Labour Party to a second term in

Opinion polls show Lange well ahead of the opposition, even though many New Zealanders feeling the pinch are bewildered as they watch others become rapidly much richer.

Lange has said there will be no early election — a poll must be held by September 19 — and that the government will not be deterred from the next items on its agenda: The issuing of bank lition that cares to apply, and the transformation of government departments into corporations charging the public for the full cost of their services.

Douglas has said the "corporatisation" programme, which means the former departments will raise their own capital on the open market to relieve the government of huge demands for funds, will complete his current programme. What he envisages if the government is re-elected is not clear, but he has hinted it will be a period of consolidation.

"I think it's fair to say that we've got most of the majorelements in place, and it's a matter of building on those," the minister told Reuters.

"We probably had the most regulated monetary system in the world (before Labour was elected in 1984) and we've moved pretty rapidly to having one of the most de-regulated... but of course with any adjustment like this goes a certain amount of pain.'

He was referring to the unhappiness felt by many lower income people, the once prosperous farming community, and the old guard of the Labour Party. They have lost the cushion

of widespread subsidies, seen by Douglas as promoting inefficiency and waste, and are paying more for basics following the introduction of a 10 per cent value added tax and the government's user-pays policy.

On the other hand, middle class urban professionals have gained from new job opportunities - especially in the burgeoning financial and service industries — the cut in income tax to 48 per cent from 60 per cent to compensate for the value added tax and the end to foreign exchange and import controls that has put them into Porsches and BMWs.

Last year nine Rolls-Royces were sold for 300,000 dollars (\$150,000 U.S.) each, compared with one every two years before Labour took office.

government's critics charge that it is creating two nations, one rich, centred in Auckland and Wellington, and the rest of the nation, struggling to

adjust.
The opposition National Party, which ruled for more than eight years before Labour's victory, is blamed by Lange for dragging

down what was one of the world's richest nations 30 years ago to a lowly 25th place.

The National Party has little to say about its own economic policies, and many in the opposition applaud some of the Labour

Young "Nats" have formed a pressure group in the party aimed at making sure a regulated economy is not restored and wooing young voters who have done well under Labour.

Douglas told Reuters that New Zealanders accepted his policies because they realised the country was in desperate straits and they were tired of being "second best all the time." They were ready to accept the challenge and reality. "We've been doing very hadly for a long time," he added. If you

look at our performance against the OECD countries we probably did worse over the last 10 years than any country.

"We haven't really turned the corner but I think, given the policies we have, two years down the track we're going to be doing as well as any country..."

Dooglas said his changes were so major that quick results could not be expected.

"When you take a big company, or even a relatively small company, if it's in trouble it takes quite a while to turn it around. So when you've got an economy that's been in trouble for a long time it takes even longer to turn it around." Douglas said the most signifi-

cant change as a result of his policies was the way New Zealanders now saw themselves - the pride in their America's Cup yachtsmen and the aggressiveness of businesses expanding overseas.

'We've also seen a change in the management style. The old boy network has gone. The directors who went (to meetings) once a month and picked up their cheque and had a nice lunch they're gone. Companies have been taken over by people pre-pared to work 60, 80, 100 hours a week if necessary.'

### Nicaraguans fight the 'coffee battle' despite threats fee plantation as though it were year.

By Matthew Campbell

LA SORPRESA, Nicaragua — A volunteer army of Nicaraguan civil servants has encamped in the hills around this settlement in the north of the country, not to fight
— though they will, if necessary - but to pick coffee beans.

Their presence indicates how crucial the coffee harvest is to Nicaragua's leftist government as grapples with a war against LS.-backed rebels and growing economic hardship.

Coffee is the mainstay of the Nicaraguan economy and if all goes well, the government says, the crop will bring in \$150 million this year, half the total export income.

"The harvest is of the utmost importance to us ... we must fight tooth and nail for it." said Armando Jarquin, head of the state coffee export company, En-

The harvest this year coincided with expectations of a surge in fighting, after U.S. congressional approval of \$100 million in mainly military aid to the rebels, known as contras, fighting to topple the Sandinista govern-

The rebels have made clear they regard the coffee harvest as a prime target for sabotage

attacks, and have warned that the lives of those taking part in the harvest are at risk. Even so, hundreds of govern-

ment volunteers have encamped in the embattled north to help pick the bright red coffee beans. Some Managua ministries were left virtually unmanned during four-month harvest, which ends in late February.

Military-style discipline reigns at this state-run plantation in the northern province of Jinotega, where 320 armed and uniformed civil servants work beside peasants in the harvest, known here as the "coffee battle."

La Sorpresa — it means 'surprise - was the aptly-named target of a rebel attack two years ago which killed 15 peasant workers and left coffee machinery in

smouldering ruins. The contras also made their presence felt as this year's barvest got under way at La Sorpresa. Two days after Christmas, two

young peasant coffee pickers were killed when their truck ran over a rebel land mine. Three others were wounded. They had been delivering meals to fellow

On January I, two coffee workers were hurt when a lorry bear-ing coffee hit a mine on the dirt road winding past La Sorpresa.
"Each day we take to the coffor an encounter with the enemy, said Freddy Montenegro, a supervisory official at the ministry of education who is now supervising La Sorpresa's harvest.

Sporting green military fatigues with a Soviet AK-47 rifle slung over his shoulder, Montenegro eared no different from any soldier in the Nicaraguan army. He said only 50 out of every

100 volunteers were selected for coffee picking here, based on their "experience in the insurrection" which brought the Sandinistas to power in Nicaragua in 1979. The volunteers are well-versed

in battle lore, having had military reserve training. They do not flinch at the frequent sounds of combat echoing through the lush green hills, and are prepared to fight to protect the coffee, Montenegro said.

For additional protection, the army has diverted several irregular warfare battalions to the richest coffee-growing provinces of Jinotega and Matagalpa to keep the contras moving while the harvest continues, government officials said.

They estimated that without major rebel interference, production this year should be just under one milion 100-pound bags, up from about 750,000 the previous

Nicaragua and other coffee producers benefited from a drought last year in Brazil which boosted world coffee prices.

Anticipating a price drop this year, Nicaragua sold half its latest crop - before it was picked - at 1986 prices above \$180 a bag, said satisfaction that the price was down to \$120-140.

Eager to encourage produc-tion, Encafe doubled the price it pays to private producers to 40,000 cordobas (about \$20) a bag this year. A bonus incentive, paid in dollars, was increased to \$10 a bag from \$6 last year.

The government has pleaded that not a single bean be left unpicked and volunteers, not just from the government, have been welcomed. This year they include five "brigades" of Americans sent by a New York-based solidarity organisation.

The rebels for their part have made clear they regard all coffee pickers as enemy collaborators.

The rebel leaders have

warned of the risk being run not just by internationalists (foreigners) but by Nicaraguans who agree to pick coffee in war zones," said a recent broadcast on contra Radio Liberation.

## 'Cars for the people'

THE CAR that was the cornerstone of Germany's postwar revival as e motor manufacturer was, of course, the Volkswagen that Hitler and Porsche hed planned before the war. Production began again in 1945 at Wolfsburg when the factory - originally almost razed by bombing - was under British control and the first cers - nearly two thousand that year - were used by members of the British military government and services.

At this point Britain considered transporting the production line to England as war reparations, and it was elso offered to the American motor Industry, but the VW was considered too ugly to have a future. Henry Ford II described it as: "Not worth e

In truth it was not beautiful, but worked. The 13-fcot 4-inch body with its drooping bonnet (housing the fuel tank) and its divided rear window made the 'Beetle' an obvious nickname for it. The air-cooled 1131-cc engine at the back reached e maximum power low down at 3,300 rpm and was noisy — but the doors shut with e satisfying clunk. With the high top gear the car needed encouragement to reach 60 mph, but it could then cruise all day at that speed. Passenger and luggage space were es limited as the performance, there was no synchromesh and the brakes were cable-operated, but the car was cheap. Its reliability

The first Volkswagen Beetles were produced in 1934.

was to become legendary. In 1949, the British military

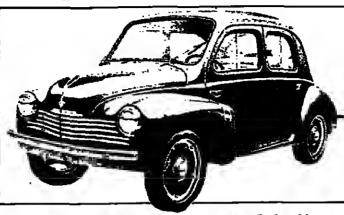

government handed back con-trol of VW to the Germans, after appointing Heinz Nordhoff, an engineer formerly with Opel to run it. It was his decision that Volkswagan should stake everything on one car - the Beetle. "I shall never follow tha fashion of bringing out new cars as though were in the haute couture busi-

ness," he declered. Nordhoff's policy worked; ex-ports began in 1950 and the car became a phenomenon, dominating the mass markets of the world. The Beetle went on and on, even after the company was denationalised in 1961, hardly changing in eppearance apart from having the divided rear window replaced with a one-plece

window in the 1950s. However, there were considerable technical improvements. The car ecquired hydraulic brakes and synchromesh, and the engine size was increased progressively, to 1192 cc in the 1950s and to 1285 cc in the 1960s. There were also -1.5-litre versions, and numerous derivatives, from sports cars and vans to minibuses.

VW production spread to other factories in Germany and to pleces as far eway as Australia and Brazil. By 1955 e quarter of e million had been sold, by 1961 five million and in 1972 the Beetle passed the record 15 million sale of the Model T Ford. But by now the car was hopelessly dated. Nordhoff had died in 1968, and the one-model policy had gone with him. The German-built

The 4CV was smaller than the

The most famous Renault of early post-war years. Designed in secret during the war, the prototype came out in 1946.

VW, being only 11 feet 10 inches in length and housing a four-

cylinder engine of only 760 cc.

This was later reduced to 747 cc

when the car began to be used in motor sport, to bring it into the

smallest competition category.

Untuned, it had e top speed in

the low sixties and achieved

quick popularity as an econo-

Basic and cheap

others thought it was a joke. The

It also hed been conceived

before the war and a prototype had been made in 1939. Cit-

mical runabout.

Beetle was allowed to make way for e new range of cars with water-cooled engines — the Passat, Golf and Polo.

However, production continued in South Africa, New Zealand and Mexico, where the 20 millionth Beetle was mede in

No other car has approached the sales of the Beetle, but it was far from being the only successful 'people's car' of the 1940s. Another, also rear-engined, was the Renault 4CV, which was being developed when the Germans overran France in 1940. Some work continued on it in secrecy during the occupation.

When liberation came in 1944, Louis Renault was imprisoned for alleged collaboration with the Nazis — he died in jail — and his company was nationalised. Thus the 4CV, like the Beetle, was e state product when production began in 1946.

roen's aim was to create a

cheap, simple runabout for people in the country areas of France who had no hope of buying any existing model - a sort of mechanised pony and

The result came as e shock at first sight. The grey, corrugeted body was reminiscent of a garden shed. The roof was a flap of canvas. The seats were made of webbing which was slung from tubular frames like deck chairs. The engine was a tiny air-cooled flat-twin of only 375 cc and it drove the front wheels. It looked cheap and it was cheep, but it was also functional.

The body of simple unitary construction welded to e platform wes designed to be taken apart quickly for repairs. The doors lifted out and the bonnet and wings could be stripped in minutes. The disc wheels were retained by only three bolts instead of the conventional tour or five. The seats were surprisingly comfortable and could be adjusted by shifting e peg. An awkward load to be carried — it was simply a matter of removing the rear seat and folding back the canvas roof. The front and rear suspension were interlinked and self-levelling — a property destined to become a treditional Citroen feature. The little engine - with synchromesh on all the forward gears, e refinement unequalled in any cheap car of the time - geve the 2CV a cruising speed in the upper thirties and a ton speed of only just over 40 mph, but a galion of petrol would keep it running for 50 to 60 miles.

"The Citroen Is the simplest and most economical instrument yet devised for moving four peo-ple and their luggage from plece to place with acceptable standards of comfort and weather protection... as functional as a bicycle or lawn mower, and it seems to serve as they do, with the minimum of skilled attention," reported *The Autocar* in a 1953

The car suited the French, who had never been interested in the automobile as e status symbol, or in weekends spent washing and waxing. Demand soon exmore than 2.5 million hed been sold. It is still selling today, though its appeal is now more to youngsters as a fun car than to Burgundian farmers.

The engine, Increased to 425 cc in 1955, Is nowadays 602 cc which has pushed the top speed up to nearly 70 mph, though it is still claimed to give 52 mph at a constant 56 mph.

In keeping with its modem, cheeky image, later Citroen

advertising mocked its own product with slogans such as "No wonder it's so reliable; there's nothing to go wrong". And one ad claimed the car had a central locking systam ('You can reach all the doors from the driver's seat') and an automatic sunshina roof ('You automatically roll it back when the sun comes out').

## **Morris Minors for**

Britain's 'people's car' was also launched in 1948. The first new Morris of the postwar period was designed by Alec Issigonis and was eminently respectable and orthodox by comparison. The Morris Minor was 12 feet 4 inches long, of unitary construction and with excellent reck-and-pin-ion steering; it was e viceless car that set e new standard in hand-

Its initial disadvantage was its aged Morris 918-cc sidevalve engine which made performance lelsurely, but in 1952 it was given a livelier 803-cc overhead-velve engine and by the end of the 1950s it had a 948-cc engine which took its top speed into the seventies. The now-classic Minor was originally available as a twodcor saloon or an open tourer one of the cheapest convertibles on me market four-door saloon and a wood-

trimmed station wagon. For many Britons it was their first car. Tolerant of beginners' mistakes, it is affectionately remembered by all who owned one. More than e million hed been sold by 1961 and more than 1.5 million by the time the Minor was discontinued at the close of the 1960s. Many cher-Ished examples are still on the roads today.

Britain's 'people's car' launched in 1948 was the sturdy 918 cc Morris Minor. Morris is no more, having been incorporated into the Austin garage.

## Austin is a winner

The Metro is not the only success story from Austin, indeed more than one Million metres on the road in such a short period is something to be proud of, but again, Austin is very much used

to success. Back in the twenties when motoring was very much restricted to the affluent, Austin introduced the "Seven", a tiny mundane machine that went places at an affordable price.

"One for each toot" was the joke of the dey, but the Seven has brought motoring to the majority

Britain became mobile, in fact too mobile, for by the mid fifties car designers started thinking of the congested cities of the fulure Once agein Austin came with a revolutionary idea; the Mini was created. A car tellored arcund four seated adults was the ideal city car. The Mini in no time became a new legend.

Naturally such engineering wealth was not restricted to the small car. for Austin has always been known to produce the functional family car. In Jordan, Austin is reputed for

strength, durability and a sense of security; it is the car thet will not let you down. Now Austin has developed

and tested a new car specifically for the Middle East, with the executive in mind. The new Montego Mayfair offers all creature comfort with the same sense of

Noting that e high standard of service and availability of spare parts are key issues to the success of any car in any market, The Jorden Automobile Co., (JAC) the local Austin distributors, have recently equipped one of the most modern workshops in

JAC reelizes that when a Jordanian motorist chooses the high standard of engineering of Austin, he demands e high standard of service; such a standard does not come about only by facilitating a modern garaga lay-

out, equipment and tools, but also by implementing an efficient managenal system and means of transfer of technical know-how.

The Jordanian motorist is not only conscious of the technical merits of the modem car, but is also concerned with the overall economy of car ownership.

Austin always strived for economy of ownership and indeed produced some of the world's best examples of lowest combined depreciation, servicing and fual costs.

In Jordan as an added bonus, the favourable exchange rate of the pound Sterling to the Jordan Dinar in reletion to other currencies such as the Japanese Yen and the Deutch Mark, suddenly caused a selected range of Austin cars to become the best value for money.

Whether it is the Montego Meyfair at the executive end of the market, or the trendy Metro with its unique personality for any application, Austin is a winner.

THE NEW RENAULT 21: AT LAST THERE'S SPIRIT IN A FAMILY CAR

new Renault is born - the spacious interior that is light, new Renault 21. Combining harmonious and please.it. The all that is best in classic and ultra modem design, here at last is a car that is designed to be extremely spacious on the inside yet feeling of spaciousness and comfort. This is the car for leisure, for holidays, for the family; but it's also the only cavemous but is practically town car, for work or daily errands. the availability of 60/40 folding rear practical good sense with a unique

dash and touch ol class. The new Renault 21 is also designed to be fun to drive. The high performance two litre injection TXE model for instance combines performance with economy. It has a top speed of 125 mph yet it can achieve a fuel consumption of only 48.7 mpg at a constant 56 mph.

The new Renault 21 is also designed to be a family car, with a

compact on the outside.

A Renault that combines

exceptionally large glass area not only gives the occupants maximum vision but also improves the ambience, with a This design for space is also applied to the luggage compartment which is not designed with a low loading height and seats on most models.

The new Renault 21 is also a long distance car with a definite character and has been designed with safety in mind. It combines outstanding roadholding with its all round independent suspension and accurate safe braking with a servo-assisted system of ventilated (except TL) front disc brakes with drums at the rear. This wintination ensures your safety whatever the road conditions.

The accent is on elegance and the appeal of this car is the balanced use of space, with flowing aerodynamic lines. A design rule that leads to efficiency. dash and distinction.

The Renault 21 has inherited all that is best in normal Renault design (front wheel drive, independent suspension), while incorporating what Is best in modern technology; in particular, integrated electronics for efficient running, monitoring and safety.

The Renault 21 is available in eight versions with a choice of two petrol engines [172] cc or 1995 cc] and two diesel engines: a 2068 cc turbo-diesel, and a normally aspirated 2068 cc diesel, plus a wide choice of equipment levels.

Discover for yourself the uncompromising motoring pleasure of the new Renault 21.

## Wind-in- the-hair driving converts a new generation

By Frank Page

Reprinted by the Munich-based M magazine

IN THE beginning, all cars were open-top. From those first primitive machines built a century ago, until well into the twenties. the automobile was almost always open to the sky. Yes, there were some majestic highroofed broughams, landaus and limousines produced for rich motorists by the luxury car makers, but they were the exceptions to the rule. The standard car had a vertical windscreen, places for four passengers out in the air and a basic, hence not very effective, canvas roof to keep off the worst of the rain,

It is worth remembering that if the Archduke Ferdinand and his wife had not been in an open car that fateful 1914 dey in Sarajevo, the Sarbian student who leapt on to the running board might not have been able to shoot them so easily. And the whole course of history might have changed.

And if the great dancer Isadore Duncan had been in a saloon instead of an open sports car when she made the grand gesture of tossing her scarf over her shoulder, it would not have wrapped itself around the rear wheel and throttled her. The open car has certainly played its part in twentieth century history.

But it began to lose popularity in the thirties for two reasons. Car travellers wanted far more comfort if they were going to tackle the long journeys that contemporary technology made possible. It didn't make sense to have reliable engines, almost puncture-proof tyres, longer-lasting transmissions and more supple suspensions if you were exhausted by the constant buffeting of the wind.

Secondly, the old-established principle of sturdy chassis and separate bodywork began to give way to unitary construction - where the whole car body provided integral strength. That meant that the roof panel was almost as important in the solidity of the car as the floor pan. The saloon became the logical way to build a car; the convertible an expensive aberration.

Nevertheless,

of somewhat rapid development.

Many of the new generation of

open cars require a strengthen-

ing T-bar over the body to keep

hardly attractive. Others suffered

from the old enemy of the con-

over a lumpy road and the whole

front windscreen and scuttle

Now we are beginning to see

the arrival of the "second gen-

an open car. The BMW 3-series

sufficiently braced.

were produced in respectable numbers until the fifties. But then the word spread that the American authorities were considering banning all open-tops as unsafe. And since the American market was the honey-pot which every car maker wanted to taste, the open car rapidly declined in popularity.

There were a few sports cars, like the British MGs and Jaguars, the Italian Alfa Romeos and Ferraris or the American sporty Chevrolets. But convertible fourseaters virtually disappeared and the car makers seemed to have lost the skill of building bodies which were strong enough below the waistline to do without the clinching solidity of a

But when the car makers realised the U.S. legislation was not going to be pushed through they began to look again at the potential for convertibles. Volkswagen set the pace in 1979 with the open-top version of the Golf, and soon lots of other manufacturers. were striving to get in on the act. Ford produced the Escort Cabriolet, Flat the Strade rag-top, Peugeot Talbot the chirpy little Samba convertible. Suddenly it was the "in" thing to have a soft-top car and zip around town on sunny days with the wind blowing in your hair.

The problem with many of the

Auburn 851 drop-head. Try to paint a picture of the

archetypal English aristocrat and the result will almost certainly turn out just like Lord Charles Brocket. Tall, charming and impeccably turned out, this handsome 33-year-old is the scion of a distinguished family, had a glittering career as an officer in one of the most pulkka cavalry regiments and is owner of one of the most elegant stately homes in England, Brocket Hall, near Hatfield, Herts. The etable block behind the house contains no less than 17 different machines. They range from a VW Golf to a Rolls-Royce Silver Wraith, but most are classic Italian sports cars of the Ferrari or Maserati tamily. Inevitably, his collection al-

ways includes some open cars, and the most attractive example is probably e Maserati 3500GTI Vignale convertible, which sits handsomely in the middle of a

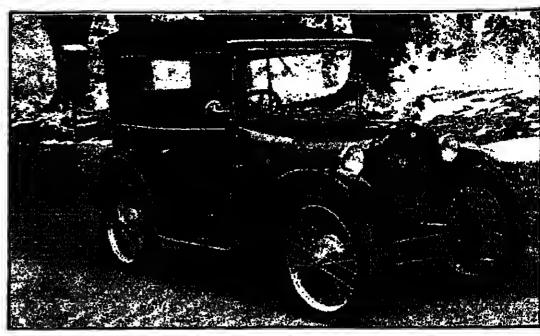

whole gaggle of scarlet classics. Simon Carrington is a baritone, them rattle-free. Acceptable, but e founder member of the Kings Singers. His current pride and joy Is a Frod 1600i Cabriolet, vertible — scuttle shake. Drive bought a year ago and already with 16,000 miles on the clock. It is the latest in a long series of area vibrates because it isn't soft-top machines, which have ranged from e 1926 Austin Seven Tourer to various opentop Humbers from the twenties eration" convertibles, with more as well as a classic Morris Cowengineering finesse and ettenley Tourer. He likes nothing bettion to the finer points of making ter, on a mid-winter day when the sun is shining, to put down the hood, turn up the heater and rush off to a concert with the wind in his hair. "Heaters in modern cars are so good," he says, "that you can have the best of both worlds - the sky above and the wind about you but plenty of warmth as well,"

#### Musicians in the open air

Musicians and artists feature and they all have soft tops. His high the lists of those who buy convertibles. Nick Mason, of the great rock group Pink Floyd, is a devoted owner of a VW Golf Convertible. So is Midge Ure of the Ultravox group. Mason is well known for his fanatical interest in motor sport, while Midge Ure was one of the moving spirits, with Bob Geldof behind the Live convertibles rapid arrivals was the evidence SS100 sports car, as well as an Ald Christmas Record which

raised a huge amount of money for the starving in Ethiopia.

Another enthusiast for open air motoing is Gray Joliffe, the cartoonist who devised the bestselling cartoon book Man's Best Friend - and it wasn't about his dog. As well as drawing scurrilous cartoons, Jolffe is a copywriter who works on the English advertising for BMW cars. "I like cars with a sense of humour," he says, "with a smile on their faces." His current favounte is a 1969 Chevrolet Carnaro SS convertible. It is the successor to a string of Ford Mustangs. "I love Yank cars. In my opinion the '69 Mustang is the best-looking car ever. I was trying to find another white one when I saw the Chevy

BMW Dixi 3/15 PS DA 1,1927/28

## The VW/Audi group — a world economic factor

The construction of VWs and Audis provides work and sustenance for far more than the 212,000 employees in VW's eight German and eight foreign factories. Twice as many agein spreed over 150 netions are employed in secondary supplier industries and in the service organisation.

#### VW/Audi at present:

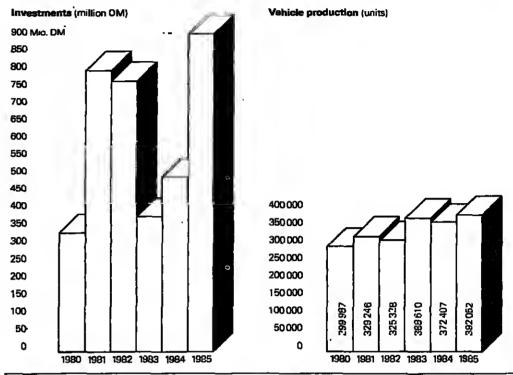

In 1986. Volkswagen/Audi passenger cars have reached the Np. 1 position in Europe for the second time.

According to the company's records, its sales have reached 1,437,400 cars, which amounts to 13.1% and is ahead of Fiat by approximately 40,000 passenger cars, followed by Ford, PSA, GM, Japanese cars and Renault.

This success adds to VW/ Audi's outstanding record and to its internationally-recognised prestigious, dynamic and modem image.

The VW/Audi group has al-ways tried to outpace its competition as an innovative and technology orientated pacemaker and as e manufacturer of up-market cars.

It has successfully acquired a personality with a high prestige claim which has maintained and consolidated its position vis-à-vis the competition as far as the aspects of sportiness, status, quality, performance, tradition, luxury and prestige are con-

### The new Audi 80:

This year, after a run of eight yeers, the 3rd generatrion of the Audi 80 makes its appearance

on the market. This new model range does

not just continue upgrading the Audi brand ushered in by the Audi 100, It also sets new standards in automobile manufacturing; standards such as full galvanisation, drag coefficient and the Audi safety system procon and

ten. In brief, a thoroughly new automobile concept which, with its many innovations and improvements, goes to underline Audi's claim to mastery of the art of engineering.

## Model T — a car which shaped social history

us that Henry Ford was an exception. In spite of producing several early models which proved to be unremarkable, with consequent financial problems, his tuck held. The Ford Model K. a large six-cylinder model offered in 1906, did nothing to stimulate his fortunes (he had not been enthusiastic about its production but was over-ruled), neither did the \$500 Model N which also appeared during 1906, although its price undercut the comparable Oldsmobile of

But the Model N had some of the features that were to become widely known in Ford's car of the following year — the homely, the ubiquitous, the best-selling Model T. "The automobile of the past," said Henry, explaining why the world needed his Model T so badly, "attained success in spite of its price. The automobile of the future must be enough better than the present car to beget confidence in the man of limited means, and enough lower in price to insure sale for the enormously increased output. In the low-priced car dwells the futura success of the automobile." He was right at the time: his witness, the sales of

15,007,033 Model T examples. The October 1908 issue of the U.S. magazine Motor carried a huge advertisement introducing the new Ford Model T to the American public. It stated: "The cars have been run under every conceivable condition. Last winter they were tried on snow-andslush-covered country roads - all summer they have run on hills, on sand and mud roads in good and bad weather. While we do

IT NEEDS no written record to tell not know how many of these cars we will build the next 12 months, the price is based on building 25,000 cars." By 1912, no less than 200,000 cars rolled off his lines in 12 months and at one point in the 1920s half the entire world's automobiles were Model T Fords. Propelling this gawky maid-of-all-work was a 20-hp four-cylin-der 2.9-litre (3¾ x 4 inches) unit,

cast in e single block with a removable water-jacketed cylinder head. The gearbox, which needed some understanding before it responded to reason, was a pedal-operated two-speed epicyclic arrangement. To be fair, it was simple enough to use, even though it gave the car an occasional tendency to run down its owner as he swung the starting handle. Transverse springs, front and rear, proved the simplest and most durable suepersion system. The Model T could travel 45 miles to a (U.S.) gallon

of gasoline. Ford sold the first Model Ts for \$850. By 1917 he had progressively reduced its price (he had promised that the car should be sold within the reach of a man of limited means) right down to \$360. War then forced prices up again, but when it was over. Ford dropped his prices again, until by 1924 the Model T rolled off the floor of the huge Highland Park factory near Detroit at a rock-

bottom \$290. If the 1901 Mercedes had presented the world with its first great step forward into modern motoring, then Henry Ford's Model T must be given the credit as the car that most influenced the pattern of social history in the Western world.

## The 1st self-propelled road vehicle and the 1st 'motor accident'

By Peter Roberts

THE scene is an arcaded square in Peris; the time, e sunny Sunday morning in 1770. Street sellers shout their wares; ladies hold their skirts as they cross the small place, their escorts at their sides. A clanking rumble is heard in the near distance. Through the trees et the far corner of the square a large vehicle slowly appears. No team of horses draws its wood-and-metal bulk; it progresses entirely without visible aid or command, save for one small figure standing high on the superstructure, struggling with e heavy iron handle. Plumes of steam can be seen escaping from its depths.

Before observers have time to recover from their initial shock, the gargantuan object clatters its way into the square on three titanic wheels - and out again, coming to e halt only after demolishing a high garden wall....

Those French spectators had witnessed the first trial of the world's first self-propelled road vehicle --- and had seen the first 'motor accident.'

Engineer Nicholas Cugnot's heavy steam-driven machine, a fardier or gun-towing tractor, had been ordered by the minister of war. The French steam pioneer had produced a working model e year earlier which had interested the army.

The full-size prototype wagon was indeed a monster, weighing about four tons and carrying an immense boiler and two bucketsized cylinders. Since the boiler was suspended over the single front wheel and was made to swing with it, disaster was predictable.

But it was the first attempt at mechanically propelled travel. There had only been dreamers and visionaries before. Cugnot's machine has been preserved. It rests in the Conservatoire des Arts et Metiers in Paris and may be seen today.

Others were soon to follow Cugnot. Englishman Richard Trevithick made several successful steam coaches and highpressure steam locomotives at the beginning of the 19th Century; Oliver Evans of Philadelphia built his steam amphibian Orukter Amphibolos. By the 1830s,

. Golden Age of Steam blos-

Notable were Goldsworthy Gurney, whose first carriage used both wheels and mechanical legs to propel it and who plug. leter set up a Glasgow 'omnibus' service, and Walter Hancock, who was perhaps the most successful with his steam coaches. His most sophisticated was Enterprise, e handsome bus-like vehicle that could be seen in the London erea where Hancock had set up a regular passenger service. Those who put their faith in road steam transport had, however, not forseen the development of steam transport designed to run on metal rails.

Reilway transport and railway lines multiplied rapidly. Cheap, direct, relatively fast, this was the welcome answer to long-distance travel in early Victorian Britain — and for the rest of the world shortly afterwerds. Steam road transport withered, and once more the roads of Britain were used only by the walker, the carter and the horse-drawn

The 1867 Paris World Fair was about to open its gates to an eager and fascinated public. Among the technical exhibits in the summer of 1867 was an engina from the workshop of Nicholas Otto & Company a small enterprise set up recently by Otto and his colleague, Eugen Langen, from Germany. Otto had shown a strong interest in engine mechanics as a youth, and had left the business world to devote his time to improving the crude but workable combustion engine invented by Belgianbom Etienne Lenoir.

Lenoir had already developed a stationary engine driven by lighting-gas mixed with air ignited in a cylinder at atmospheric pressure - a machine that was quiet-running, hed the advantage of Immediate starting, did not require large and frequent doses of water - and that gave just 1hp for a 6-litre capacity. It was, by any standards, abysmally inefficient,

However, to Lenoir must go the credit due to the producer of

particularly in England where a the world's first self-propelled strong interest was shown in vehicle — one could hardly call it promoting public transport, a a car - in 1860. He had reduced period that could be called the the cumbersome engine to underseat size, fuelled it with petroleum vapour, and it would be only a slight indulgence to say that this remarkable cart had an electric ignition and a spark

However, thought Otto, if the non-compressing Lenoir unit could be modified to include a compression stroke, thus concentrating the gas-mix in the cylinder, the following explosion after Igniting the stuff would give the unit more powerful kick. It did, although this was not yet a four-stroke engine, as the gases were compressed before entering the cylinder. During these developments Otto had in fact designed a four-stroke unit, but had abandoned it in favour of his unwieldy two-stroke engine.

Gasmotoren-Fabrik Deutz, as the flourishing Otto & Langen company was called in 1872. employed a technical managar with a somewhat forceful character. Gottlieb Daimler, a baker's son from Schomdorf was an engineer destined to earn his piece in history as one of the "fathers of the automobile."

Daimler engaged e new chief engineer, Franz Rings, who with Otto himself followed up the abandoned four-stroke engine of earlier years; the fiery manager had long held that the current Otto engine could be greatly improved by dasigning the operation to include compression. Prototypes were built and successfully tested in late 1876.

The Daimler-prompted engine from Gasmotoren-Fabrik Deutz marked a major success in the development of the internal combustion reciprocating petroleumfuelled engine, a breakthrough that separated it in history from the experimenters and the dreamers of the past whose devices either failed in practice or were never developed enough to interest the general public. And at this point in history Nicholas Otto has his niche, tco, as the inventor of the four-stroke cycle, known as the Otto cycle even

During this last quarter of the 19th Century the world was ready for many changes; parti-

Dalmler's interest in fine en-

evening work here brought him, at 19, e job with a large French firm producing railway rolling stock and locomotives. He soon learned French.

The youthful, energetic Wurttemberger also realised that steam engines and steam locomotives were not his vocation, and tried to persuada his directors that e small light engina powered by some method other than steam, an instant-starting engine which would 'cost a modest sum to run, could be used in factories that were too small to afford or need the current large engine' would, if manufactured, show a profit. He failed to convince anyone, and resigned.

By this time, 1862, Lenoir had patented his own engine. Steam experts derided its possible uses, declaring that although it needed no heating apparatus, it would need constant lubrication, and so on and so on - anything to confound opinion about an engine that clearly had e future.

A visit to Paris at the height of the Lenoir phenomenon further stimulated Daimler's wish to de-

velop an engine independent of

gines and cars, and indeed owes more to him than to his master, Dalmler, In March 1872 Daimler 'was

steam — and independent of a fixed fuel supply as provided by piped town gas.

Gottlieb Daimler, now e mature 28 years old and luckily with few financial worries, spent these

years moving around Europe in search of engineering ideas. The footloose engineer went on e peripatetic trip to England in 1861, finding Leeds' 'satanic mills a fascinating scene and working there for a period in a machine shop, moving on to Manchester to work for the firm of Roberts & Company makers of machine tools, steam boilers and

At Daimler's next job he met Wilhelm Maybach, 12 years his iunior and a self-taught engineer of brilliance. Maybach was to play a significant part in the design of Daimler's early ensome say that modern transport

appointed manager of Gasmo-"stall in a four-wheeled phaeton. Maybach with him.

As early as 1875 Gottlieb the atmospheric types, but with little success at first. Franz Rings now took a technical hand, dethe company, under Daimler's direction. The research diary entry of May 9, 1876 shows the first and as the originator of the principle, the system bore Otto'a name. It was the foundation of all that followed.

Daimler and Maybach decided to set up on their own there had been disagreements at the company and Daimler's two basic percepts for engine success, e high rate of revolution and light engine weight, had been ignored. The new Otto fourstroke units were still slow-operating heavyweights. By 1882 they had set up a workshop - e greenhouse and lean-to shed -in the spacious garden of the Daimler family house in the Taubenheimstrasse of Cannstatt, near Stuttgart, where together they built their first working fourstroke petrol engine.

For the late 19th century, the engine was indeed high-speed, as Daimler had laid down in his prime requirements; at up to 900 revolutions per minute it was faster by far than the larger stationary engines, which were also about 10 times heavier than Daimler's small single-cylinder

Two years later the two engineers and Daimler's 16-yearold son, Paul, were trundling around the garden paths at Cannstatt on the world's first petrol-engined vehicle, a crude motorcycle. Daimler had no ingoing motorcycle, and, in lact, it was more than a decade later that the first practical motorcycle was seen. His intention had been to create an engine capable of his first four-wheel vehicle. powering either mobile or stationary machinery.

But by 1885, after two years of development - and one deadol-night visit by the local police who thought he might have been Torging coins - the now-improved engine was ready to in-

toren-Fabrik Deutz and he took . Daimler had ordered a sturdy model, saving that it was to be e birthday gift for his wife and Daimler had begun ex- quietly fitted his 1-hp engine into perimenting with gas engines of the rear floor-well of the carriage where it sat like an oversized samovar near the rear passen-

ger's legs. It was coupled to the signing a true four-cycle unit for rear wheels, and a steering no directed the front wheels. Early the following year, 1886 Daimler's 'birthday' coach could record of a four-stroke engine, be seen clattering through the extensive gardens of Daimler's. home. Later it outtered out on occasional clandestine sorties

along local roads. Now Gottlieb Daimler saw his life-long aspirations in tangible form. His engine would propet everything on wheels and every craft that olied the ocean routes. but first a motor-powered boat for the local river, the Neckar Not six months after the first engine was built he had installed another in a small river boat and was soon sitting at the titler, silently propelling it up and down the Neckar to the complete astonishment of the people of Cann-

Daimler went on to power a fire engine, a small airship, a tram, a rail-road car and other vehicles - all within e couple of years. His immediate success, however, came from his engined boats

people seemed less apprehensive of this nasty' 'explosion' engine when it was surrounded by water - and he built several for German royalty and other eminent people.

Meanwhile at Mannheim...

At this point in history one had to take a day's carriage-ride down the road to Mannheim to meet another German engineer who was working on an almost tention then of creating a road- identical project and who, in fact, produced the world's first practical motor car --- just after Daimler had built his motorcycle, but before he had publicly exhibited

Karl Benz's background was in many ways similar to that of Deimler, with the exception of the financial support that Daimler could command. Physics and chemistry were his subjects and

## **IBIZA "MOULDS GERMAN ENGINEERING"**

Before the SEAT Ibiza hatchback was even drawn or thought of, we broke the traditional mould of motor construction by actually asking what people were looking for in a new small car.

Their response wasn't too much, of a surprise; they simply wanted the best of everything - German Engineering and Italian design in SEAT one car.

So we went out to create it for them.

Osnabruck in Germany was the first stop where we secured for the Ibiza e Karmann bodyshell and structural design. Then on to Stuttgert for a System Porsche engine and gearbox.

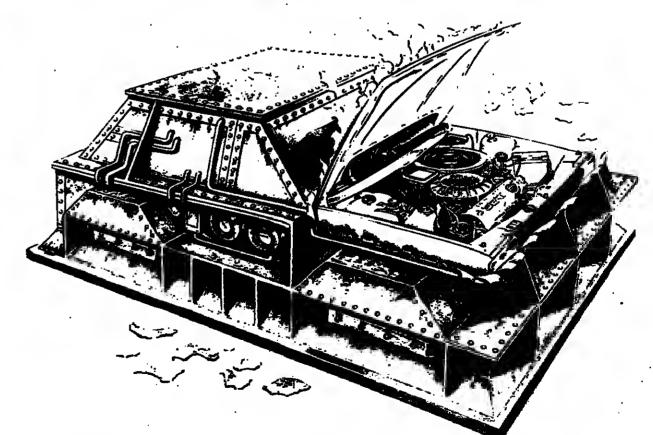

(They push the 1.5 GLX version from 0-60 In 9.9 seconds and to stop speed of 109 mph)

Next on the agenda was a sleek. distinctive design. And who better to provide it than the crack Italian car designer Giorgio Giugiaro (his pedigree includes the BMW ML, the Lotus Esprit and the original VW Golf).

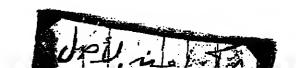

Once in hand, we at SEAT built them into a car no mould could

## The 1st self-propelled road vehicle and the 1st 'motor accident'

### (Continued from page 8)

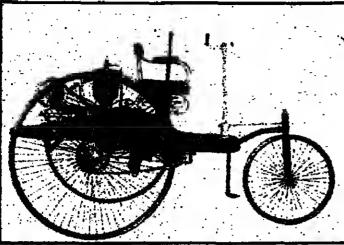

his hobby was photography. then in its early form. A period at the Karlsruhe Polytechnic, taught Benz, like Damler, to search for a more efficient engine than the ponderous steam giants of the

The key invention was to be the internal combustion engine, and several minds were directed to this end during the 1860s.

Karl Benz also found work in a locomotive-building factory at Karisruhe, the very company that appointed Gottlieb Daimler as its chief engineer just three years after Benz had left. Benz was also to come into contact with Otto's atmospheric engine which also fired him with a desire to improve it.

Benz and his pretty wife, Bertha, who became his lifelong inspiration, set up a tiny machine shop in Mannheim in 1872. Their main assets were faith, hope and energy, and to augment their meagra living, Karl took orders for making clamps and pipes for the building industry, and even took on the hydraulic pressing of tobacco into plug. Occasionally a court order to repossess their goods threatened total ruin.

With what tools he had left after vet another domestic financial disaster Karl Benz turned to his long-term goal, the small high-speed engine. He knew that only some dramatic achievement could save them from catastrophy, and Karl worked feverishly on improving a two-stroke engine hall-developed by Scotsman Dugald Clerk. Otto had recently patented his tour-cycle

engina, and thus anyona else who wished to pursua the development of the internal combustion motor was forced to do all his experimenting with the two-stroke (or two-cycle) pro-

Tha trouble, as in all these early engines, was ignition — the fuel mix would often ignite outside the cylinder and cause havoc. Benz managed to overcome this danger and also arranged that hot exhaust gas was expelled before the fresh mixture was introduced.

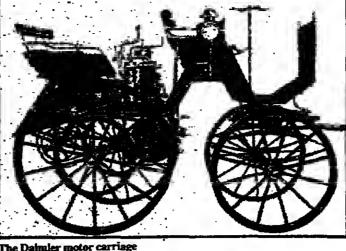

#### New year bells

Karl Benz's two-stroke engine design took it far into technical terra incognita, where it remained stubbornly silent. Tha project was life-or-death to 35year-old Benz and his family. For them the New Year's Eve that heralded 1880 was grim. To-

the garden workshop and try to start the thing just once more. In his later memoirs Karl Benz

wrote of that moment in moving terms: 'So there we were, standing in front of the engine as if it were a great mystery ... my heart was pounding. I turned the crank ... the engine started to go putput-put, and the music of the future sounded ... If sorrow had been our companion on the way over there, joy walked beside us on the way back ... Suddenly the bells started to ring - New Year's Eve bells. We felt they were not only ringing in a new year, but a new era for us ...'

Court photographer Emil Buhler saw Benz's machine and immediately lent funds for development, giving the penniless couple a brief breathing space. But after three months of altercation Benz resigned from the newly formed company. Now fundless again and with four chilwards midnight Bertha sug- dren, Benz doggedly went back gested that they go out again to to his engine development. By

1883 he had set up business once again — Benz et Cie — to build combustion engines to the design of Karl Benz' as the company articles stated.

Benz, with partners Rose and Esslinger, made engines to the Benz pattern for static uses, but Karl was still preoccupied with making a motor vehicle driven by his own engine, an aim which was not shared by his colleagues. 'When the company is making enough profit, then we can think about taking a jump into the future' argued the partners who held the pursestrings.

Unlike Daimler, Benz was concemed only with a motored road vehicle. His engine was an inteqral part of a complete design that was new from tiller to tyres. His designs were formalised in German Patent No. 37435 of 29 January 1886, but the car was built and running during late 1885. Meanwhile Benz was improving the ignition, the carburetion and throttle control, until in

July 1886 he held a public demonstration of the car.

The water-cooled cast-iron single-cylinder engine with horizontal flywheel developed about 0.8 hp at 400 rpm - an extremely high rate of rotation for any power-machine of the day. The car (short for carnage) had a lone front wheel which coped well enough with the steering for several years, until Benz solved the geometric problems associated with steering two front

Benz had overcome the hazardous ignition problem with 'a Ruhmkorff trembler coil with a buzzer interrupter,' a spark plug (made by himself) and a chromic-acid battery, a far more sophisticaled system than Daimler's uncertain hot-tube ignition. The steel-framed three-wheelers top speed was about 9 mph, and its tocal-journey reliability was

motoring 'joyride' reads like something from a Disney story almost too good to be true .and for many years was doubted as historic fact for this reason. However, research has confirmed that Bertha Benz and two of her children, Richard and Eugen, did indeed prove the car in no small way one Sunday in-1888. They had, by then, often been out for an evening spin along the road from Mannheim to Weinheim - about 6 kilometres (4' miles) but had never tested the car over a longer route.

Secratly mother and sons set

The first advertisement for Karl Benz's Patent Motor Wagen, dated 1888. Selling at 2000 marks this machine, we

are told in the ad, runs on paraffin, petrol, or naptha, and 'is an agreeable vehicle as well as a mountain-climber.'

oft early, while father Benz was away, and headed for the neighbouring town of Pforzheim. Their journey had its problems: replenishing water, finding an apothecary for petroleum fuel, pushing the car up tha hills of the region, persuading a combler to

using Frau Benz's garter as a replacement rubber insulator. All were overcome and they sighted the lights of Pforzheim at dusk. They had travelled about 100 km (60 miles), the first-ever longdistance day-trip in a motor car.

## **Hungary beats Cyprus 1-0** in European soccer match

NICOSIA (R) — Hungary beat Cyprus 1-0 with a goal early in the second half to win the team's first points in a European Soccer Championship Group Five tie here Sunday.

It was a day of firsts for new Hungarian manager-coach Jozef Verebes, making his national dehut with a virtually new team still smarting from a shaky start to the current championship.

Istavan Boda shot home the spectacular solitary goal in a game which generally reflected the lazy haze of a warm Cypriot Sunday afternoon.

Boda's chance came four minutes into the second half when Cypriot hack George Lemesios, earning his first national cap, hungled a defensive clearance under Hungarian boots.

Boda collected the errant hall and scored with a stunning 40-45 yard drive low into the back of

the Cypriot net. Hungary had lost its only other main chance to score four minutes before halftime. Cypriot keeper Andreas Charitou, chal-

on a goal run. Hannick booted the penalty shot into the crossbar. Both teams played dull football

in the first half.

In the second half, Hungary's skilled teamwork came together hut Cyprus continued to be dull. It made none of its defensive sallies into enemy territory which has often made it a dangerous

## Tottenham downs Arsenal Curry knocks out in 1st match of cup semis

advantage over its north London soccer rival Arsenal in the semifinal of the Littlewoods Challenge Cup Sunday.

Allen's 39th minute strike, against one of his former clubs, made it a miserable weekend for Arsenal, which surrendered its unbeaten home record the day after losing the English First Division leadership to Everton.

In a highly-charged atmos-phere hefore 41,306 fans at Highhury. Tottenham looked the more composed side and created the better chances, although Arsenal's Perry Groves hit the post in the second half.

Glenn hoddle, Tottenham's stylish midfielder, twice shaved

LONDON (AP) - Clive Allen's the Arsenal goalposts with long 34th goal of the season gave range shots, and Allen missed an Tottenham Hotspur a 1-0 first leg easy chance only seconds after bagging the only goal of the

> The winning strike was a typical piece of Allen opportunism after Arsenal failed to clear e corner. Goalkeeper John Lukie made a fine stop from Garv Mabbutt's close range shot, but the hall bohbed up to Allen, who headed it home.

> Without the suspended Viv Anderson and David Rocastie. Arsenal looked unsure in defence and disjointed in midfield. Its reshaped side failed to crack a well-organised Tottenham defence and whenever Arsenal tried to bombard the visitor's goal with high crosses, goalkeeper Ray Clemence was secure in his handling.

## Kasparov, Short team up for 'speed chess' match

LONDON (AP) — It's fast-paced. It's glamorous. It's "speed chess". a six-part, videotpaed challenge match with world chess champion Garry Kasparov and British grandmaster Nigel Short playing at more than five times normal speed.

Kasparov and 21-year-old Short, dressed in natty dinner jackets, played chess before the cameras this week in London's glittering Hippodrome Discotheque. The videotaped match is to be broadcast at a later date, as yet unannounced, and the audience was asked not to reveal the out-

Promoters hope the speed challenge match, concluded Thursday, will gain a wider audience for the cerebral board game with the staid image. Before each game, the audi-

ence was treated to a laser show at the discotheque in Leicester Square, the heart of the West End movie and theatre-land, The chess players' moves were

automatically transmitted by sensors in the board onto a giant screen that, after dark, is used to show rock videos.

"Of course, this event was a great idea, which will help to get chess noticed and understood hy a wider audience," said Kaspar-

ov, a 23-year-old Soviet citizen "This is just the beginning of a long road with many similar events to show people the element of pure struggle in chess," be said.

The players had only 25 minutes apiece for all their moves. compared with the five hours allotted for the first 40 moves in regular international matches. In addition, digital readouts of the minutes and seconds each player had remaining to finish the game added to the intensity of the play. The six 30-minute programmes were made by London's Thames

"I think we achieved the right halance with quick games, the electronic display and interviews with the players before and after each game," said producer Michael Feldman.

He said late night coverage of Kasparov's World Championship match with fellow Soviet Anatoly Karpov last summer achieved four times the regular midnight viewers.

The British Broadcasting Corp. has shown programmes on chess. but with a slower-moving format. Feldman says the next move could be speed tournaments broadcast live,

. Kasparov has captured the im-agination of audiences around the world with his aggressive play and outspoken manner. Flamboyant and extroverted, he spent part of the news conference before the speed challenge match dodging questions from a pop music magazine about his sex life.

## Montgomery to win U.S. title

LAS VEGAS (R) - Donald Curry knocked down fellow American Tony Montgomery three times before winning by disqualification at 2:29 of the fifth round to capture the vacant United States Boxing Association Junior middleweight championship.

Curry, in his first fight since losing the world welterweight title to Britain's Lloyd Honeyghan in September, moved up in

weight classification for this bout. The former welterweight champion completely dominated the fight and appeared ready to finish off Montgomery in the fifth when Montgomery was disqualified by referee James Molinell after head butting Curry in the

Montgomery had been warned twice about head butting earlier in the fight and had two points deducted for the illegal tactic.
But the disqualification just hurried the inevitable as Curry

was in control from the begin-He knocked down Montgomery with hlows to the head in the

second and twice in the fourth. By the fifth round, Montgomery looked like a tired, beaten fighter who could not hold off the stronger Curry. Curry now has a record of 26-1

with 20 knockonts while Montgomery is 17-1 with 10 knockouts.

### Japan's Taniguchi wins Tokyo Marathon

TOKYO (R) - Japan's Hiromi Taniguchi staged an upset hy winning the Tokyo Marathon in two hours 10 minutes 06 seconds here Sunday.

Taniguchi, who won the Beppu Marathon two years ago in his first outing, beat foreign and Japanese favourites, including fellow-countryman and Asian Takeyuki winner Games Nakayama, who came in second in 2:10:33.

Pre-race favourites Abebe Mekonnen of Ethiopia finished third in 2:11:54. But Ahmed Salah of Djibouti, winner of the 1985 World Cup marathon, gave up at about the 25-k m point.

"I was in good condition. I'm happy to win the race. But I wanted to cut two hours 10 mioutes," Taniguchi said,.... It was the second win in five

marathon races for the 26-yearold man:from Kyushu, southwestem Japan. But he failed to improve his previous best of 2:10:1. which he achieved when he placed second in the Fukuoka Marathon in 1985.

The Controller P.O. Box 354 Amman, Jordan

Deadline for submission is February 15, 1987. Top candidates will be called for personal interviews.

## India-Pakistan cricket test ends in draw

MADRAS, India (AP) - Pakis- excessive pad play. tan scored 182 for three in its draw in the first cricket test against India here.

India's spinners failed to strike on a fifth-day wicket which assisted little turn, and Pakistan easily played out time after losing two quick wickets.

India, 40 ahead on the first innings, declared at its overnight score of 527 for nine and met with immediate success when makeshift opener Rameez Raja was dismissed in the day's fourth over, hy Raju Kulkarni,

First innings century maker Shoaih Mohammed and the sedate Rizwan Uz Zaman added 53 for the second wicket, but India kept the pressure on getting rid of Shoaib, 45, in the last over before

Javed Miandad, 54, and Rizwan Uz Zaman, 54 not out, took Pakistan to safety with a 90-run third wicket partnership in 132 minutes, countering the spin with said Kapil Dev.

The match was called off after second innings Sunday to force a the 10th mandatory over, bowled by Sunil Gavaskar who delighted

the sparsely populated stands inpersonating Abdul Qadir's bowl. ing action.

The traditional rivals now move to Calcutta for the second test of the five-match series he ginning Wednesday. Rival captains Kapil Dev and

Imran Khan expressed surprise at the behaviour of the Chepanks wicket here, which eased out after assisting spin on the first A total of 1,014 runs was scored in the first two innings for

the loss of 18 wickets and 19 sixes were struck on the mysterious wicket, which was expected to deteriorate as the game progressed. "We had a chance when we

took two early wickets Suaday morning, but our spinners were unable to extract turn later on.

### Noah takes Lyon tennis tourney

LYON, France (AP) — Topseeded Yannick Noah of France defeated Sweden's second-seeded Joakim Nystrom Sunday in the final of the \$174,000 Lyon Grand Prix men's tennis tournament.

Noah, 26, won 6-4, 7-5, in a match that lasted 75 minutes to receive a first prize of \$30,000 and 150 Grand Prix points.

Nystrom, 23, started the match strongly by hreaking Noah's service in the second game. But Noah broke Nystrom's serve in both the 3rd and 5th games to win the first set 6-4.

In the second set, everything to love in the 11th game to lead and it worked."

6-5. Serving for the match, Noah delivered his 13th ace at 30-30 for match point. He put away an easy forehand smash after a wellplaced service to win the title.

Noah, ranked no. 5 in the world, had not beaten Nystrom, ranked two places lower, since the Stockholm tournament in

"I tried to change tactics," said Noah after the match, "The first three times we played, 1 tried to attack too much, although that's my game, Today 1 tried to be a In the second set, everything hig more patient, play the fore-went with serve until Noah broke hand more than the backhand,

## Weekly Financial Report

- By Fouad Batshon

The following report summarises trading activities in Amman of major European and Arab currencies as well as gold prices. The writer is a foreign exchange dealer at the Arab Finance Corporation (merged with Halim Salfiti and Sons Co.).

AMMAN - Last week the U.S. dollar opened strong and moved higher to reach 0.342 fils on the JD. The correction that led the dollar to move higher from 0.3300 fils to 0.342 fils was mainly due to short covering on the dollar from the international dealers and to the better U.S. economic figures that were released last week that was in favour of the dollar.

In the local market dealers were ready for this correction. Banks and financial companies covered their short positions on the dollar early last week.

Charts indicate tht the dollar could move a little higher in the beginning of this week but by the mid week, it will drop back to test the low levels it tested before. The expected ranges for this week are 0.335 to 0.348 fils.

 $\mathbb{M}_{\mathfrak{r}_{\mathfrak{t}}}$ 

3:

20 1

#### Trading in European currencies

The pound sterling fell lower testing its support level at 0.5080 fils. The strength of the dollar and the lower North Sea oil prices were the main reasons behind the drop in the sterling. It traded between 0.5080 to 0.520 fils. The D.M., S.F. moved lower, slip-

ping to their support levels on the news of the American economic figures. The D.M. traded between 0.175 to 0.182 fils, the S.F. between 0.2080 to 0.219 fils.

#### Trading in the world metals

Due to the strong dollar and to the tension in the Middle East, gold moved a little lower but did not break its support level around the \$397 an ounce. Fundamental reasons were behind keeping the gold, silver and platinum prices

above their support levels. Gold traded between \$397 an ounce and \$406 an ounce. Charts indicate that gold should be bought around the areas of \$395-\$398 an ounce and sold around \$404 to \$409 an ounce.

### Trading in Arab currencies

The Lebanese lira (L.L.) scored new lows against the dollar and the JD because of the bad political and economic situation persisting in the Lebanon. It traded between 290 - 250 L.L./JD.

The Syrian lira traded between 73-65 S.L./JD. The Kuwaiti dinar traded between 1.2180 to 1.2250 oo the JD. The Saudi riyal traded between 0.091 - 0.095 fils. The Egyptian pound traded be-tween 0.1780 - 0.1800 fils and the Iraqi dinar between 0.2650

~ 0.270 fils. Gold prices in Amman, based on the daily bulletin provided by the Jordan Jewelery Store, are as follows.

Gold per gramme 21 carats JD 3.450/3.650

Gold per gramme 18 carats JD 3,250/3,450

## Horoscope from the Carroll Righter Institute

FORECAST FOR MONDAY, FEB. 9, 1987

GENERAL TENDENCIES: Daytime changes where home, family and property interests are concerned can be replaced by a calm and successful evening. Go along with any plans for revision.

ARIES (Mar. 21 to Apr. 19) Outside affairs and home matters could be conflicting if you do not plan your time

TAURUS (Apr. 20 to May 20) You may find it difficult to make your plan of action work properly. Others won't accept your ideas now.

GEMINI (May 21 to June 21) New situations must

develop before you can handle your practical affairs. Listen to advice from experts. MOON CHILDREN (June 22 to Jul. 21) A new con-

ict tries to force you into him, or her, so be careful. LEO (Jul. 22 to Aug. 21) Some problematical affair

seems to be getting worse, but keep applying yourself and you solve things. VIRGO (Aug. 22 to Sept. 22) Think of the friends who can assist you in gaining aims, but contact them tonight

for best results. LIBRA (Sept. 23 to Oct. 22) You need to use more care in outside career affairs. Try not to lorce your public

SCORPIO (Oct. 23 to Nov. 21) Avoid getting into new interests today. Be very discriminating and steer clear of fast talkers SAG1TTAR1US (Nov. 22 to Dec. 21) You may find

it difficult to keep any promises you have mada, but persevere and all goes well.
CAPRICORN (Dec. 22 to Jan. 20) Ba more objective and avoid an overly emotional person who could upset

AQUARIUS (Jan. 21 to Feb. 19) Keep plugging away at your activities even though you have to contend with

PISCES (Feb. 20 to Mar. 20) Your talents are not working very well today, but later you find romance and recreation very rewarding.

THE Daily Crossword by Jeense Wilson

### Internal public debt in Jordan totals JD 478m

AMMAN (J.T.) — Jordan's outstanding internal public debt totalled JD 477.9 million at the end of November 1986 according to the monthly statistical bulletin issued by the Central Bank of Jordan (CBJ).

The amount was spread over five sections, but the highest figure appeared as advances which classified as ordinary, extraordin-ary and "against profits", totalled JD 198.8 million.

No clarification was given for the sum of JD 15 million, extended under "advance against profits," although the figure was unchanged from the amount that first showed in 1985 when it was also amortised before the year ended.

The ordinary advance, amounting to JD 124.5 million, and the extraordinary advance, amounting to JD 59.3 million were record outstanding balances

The section of treasury bills ranked second in volume with a JD 118 million total of which JD 117.1 million showed on the balance sheets of commercial banks. The remainder of the sum was held (financed) by other unspecified sources.

Government bonds secured JD 117 million but the boldings of the commercial banks amounted only to JD 51.3 million.

The CBJ portfolio stood at JD 24.3 million, while JD 41.4 milbon of bonds were covered by "other" bolders.

Bonds of public corporations (government or semi-government organisations) drew JD 23.2 million of financing, mainly from commercial banks for JD 19.8 million. "Other" institutions and the CBJ bought bonds for JD 2.4 million and JD 0.9 million respec-

The commercial banks were the sole buyers of treasury bonds which were issued for the first time last year. The amount that the banks disbursed against the bonds totalled JD 21 million.

### Sale of British Airways shares attracts millions

LONDON (R) - The British Airways share offer was 10 times oversubscribed, the gövernment said Saturday night. "The sale of British Airways shares has been a resounding success," Transport Secretary John Moore said following the closure of the offer. There were applications for 7.8 billion shares although only 720.2 millioo were on offer. As a result, the number of shares originally earmarked for major financial institutions and overseas investors will be scaled down to give the British public a larger portion of the issue. Trading in the shares, priced at £1.25 (\$1.90), is due to begin on Wednesday. The £900 million (\$1.35 billion) sale of the state-owned airline to the private sector is the latest in a series of denationalisations by Conservative Prime Minister Margaret Thatcher.

shares. It is tough on an already debtladen Third World. The move to securities, bank-

ers say, is one reason wby trading volume in the once obscure Eurobond market - which deals in bonds issued in currencies outside their country of origin - rose to more than \$2,500 billion last

Foreign purchases of U.S. treasury securities soared, too.
The Organisation for Ecooo-

mie Cooperation and Develop-ment (OECD) says that the volume of international medium and long-term borrowing rose 11 per cent last year to \$317 billion. But bank loans fell three per cent to \$58 billions. Financing through

case of companies, to offer

up 35 per cent from 1985. Some bankers doubt this heated pace can be maintained, but add that much of the slack may be taken up by commercial paper short-term debt instruments issued by companies or banks

who want to raise money. The volume of new Euromarket commercial paper last year elimbed to \$60 billion from \$9 billion in 1985.

The attraction of commercial paper is not only that it is tradeable, but that its short life never more than a year — also reduces banks' risk.

Short-term lending, through the interbank market, bas also surged, with the latest statistics of

the Bank for International Settle-

mooey by issuing bonds or, in the international issues of bonds ments (BIS) showing a \$157 bil-case of companies, to offer meanwhile rose to \$226 billion, lion rise in the third quarter of

These funds, flowing between

banks, were largely used to fioance banks' own bond buying.

"Banks are not really leoding, but are financing each others' securities purchases," said a French banker. "We can oo lon-ger exploit the LDC's (less-developed countries) and so we're trying to exploit each other."

He added that using short-term interbank funds to finance longterm assets like bonds "has historically always been a recipe for a market collapse."

The hazard is that interest rates can change to cause the cost of the repeated sbort-term borrow-

ing to outpace returns on the long-term assets.

## Experts fear big bust for Big Bang

LONDON (AP) — Some people in Britain's financial district are wondering if the Big Bang will turn into a big bust.

In some quarters inside and outside of The City. London's financial district, optimism and pride over Britain's huge financial deregulation bave turned into

fear and embarrassment. Although investors benefit from the increased competition Big Bang has brought — in the form of lower commission costs - stockbrokers' profits and highflying salaries are feeling the

### Open hiring, open firing

If and when the bull stock market turns bearish, some financial companies are expected to go out of business. Traders already are paying for the new open hiring with open firing.

Big Bang also has been marred by coincidental insider trading scandals and the resulting concerns that the government hasn't replaced the old system with regulations adequate to protect investors from fraud.

There will be some blood on the floor, no doubt about it," said Mr. Tony Barnes, managing director overseeing the European financial services division of Korn-Ferry International, an executive recruitment firm.

"The feeling that The City could go on and oo, that the merry-go-round would never come to a stop — that has come to the end. It's happening quicker than people thought."

Overall, The City's reputation has suffered. When the Institute of Directors, a business leaders' group, recently asked 200 comdirectors what they thought of The City's image, 59 per cent said it was worse than before Big

Bang. Opposition members in parliament increasingly have criticised the Conservative government's bandling of City affairs in well-publicised attacks. Critics say Britain is focusing too much attention on its service sector at the expense of its manufacturing in-dustries, some of them hard-hit.

Under Big Bang, minimum commission rates were abolished, the distinction between brokers and jobbers — those who make markets in a stock - was ended,

and foreign firms were allowed to become members of the London Stock Exchange. In the long run, Big Bang is

supposed to make it easier and ebeaper for companies to raise The bulk of the changes took effect on Oct. 27 and were in-

tended to ensure London's place as a major financial centre in an increasingly global market. That appears to be working according to plan. The Economist magazine said monthly equity

turnover on the exchange rose from £11.7 billion (\$17.55 billion) in September to £14.25 billion (\$21.4 billion) in December. But almost half of all trading in

British equities now is free of commission. And on the remaining trades, commissions have fallen 40 per cent to 0.26 per cent, the magazine said. It said it assumes that the average spread between the best offer and bid price has fallen to one per cent from 1.5g per cent.

few large financial firms are making money dealing in domestic equities, and many are losing a bundle, The Economist reported in its Jan. 24 issue.

Three months after Big Bang,

More than balf of the 27 dealers of gilts — British government bonds — are unprofitable, the magazine said.

It estimated that annualised revenue from commissions and market-making by jobbers and stockbrokers on the London Stock Exchange was more than balved from £890 million (\$1.335 billion) in the January to September 1986 period to an annualised rate of £415 million (\$622.5 million) in December.

And the firms bave had to bear much higher costs, it noted, in- firms that made fewer mistakes in cluding computer expenses and bigger payrolls.
Giles and Overbury, one of

London's oldest independent stockbrokers, went out of business in January. The firm declared itself insolvent after its

Mercantile House Holdings Plc, parent of stockbroker Alex- of the public. anders Laing and Cruickshank, recently reported that its profit in the six-month period ended Oct.

The most publicised scandal has been at Guinness Pic, the giant brewer.

31 sank 17 per cent to £27.1 million (\$40.65 million). Mercantile cited, in part, the cost of preparing for Big Bang.

Mr. Mervyn King, a professor at the London School of Economics, said: "We have independent evidence that lower transaction costs do increase turnover. The question is, will the response be big enough? That is as of yet unknown. A lot of people still expect a big fallout."

Mr. William Landreth, head of equities at Goldman Sachs International Corp., said: "What is frightening is that these concerns are arising when volume is up and the market is high. If the market reverses, 1 think you would have losses." British firms "bave to be con-

cerned because they bave a lot of people chewing away at them at different sides," Mr. Landreth said, referring to the impact of American and Japanese entrants Average salaries, which rose

50-100 per cent before Big Bang, are expected to fall back by 15-25 per cent in some Big Bang jobs, The Economist said. And new staff members

already are walking through the doors of the agency that recruited them, looking for another job, the magazine said. "Either their employers are

disillusioned with them or, more rarely, they with the job," it said. Mr. Barnes, the executive recruiter, said some British firms may-feel more of a squeeze because they locked themselves into higher salaries instead of using the American firms' flexible bonus system.

Big Bang are expected to dominate The City, gobbling up the less efficient.

In the inevitable shake-out, the

"The rich and smart will get richer and smarter. And the rest will have to fend for themselves," said Mr. Barnes.

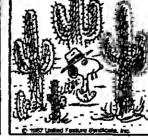

parent, Charnley Davies, an insurance broker, encountered problems from expanding too quickly on borrowed money, the Times of London said.

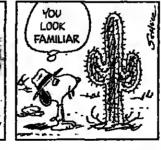

Big Bang was followed by a succession of insider trading scandals. Although the alleged wrongdoings generally took place before Big Bang, the two are wrongdoings generally took place before Big Bang, the two are probably intertwined in the minds

## Philippines land reform may undercut rebels, aide says

MANILA, Philippines (Agencies) — A cabinet minister said Sunday the government is pursuing land reform not simply as part of an anti-Communist strategy but "because the country needs to move forward."

The 23,500-strong Communist New People's Army (NPA) has said land reform is one of the main goals of its 18-year-old insurgency. The rebels refused to extend a ceasefire pact that expired Sunday opening the way to possible future clashes.

"The Agrarian reform is not part of the counter-insurgency programme," Minister of Agrarian Reform Heherson Alvarez told reporters. "It is something our farmers and farm workers have long deserved and the country needs to move forward. (But) if in the process of achieving land reform, we pull

reaching of all government prog-

the rug from beneath the rehels,

Mr. Alvarez said President

so be it." he said. He called land reform the "most urgent (and) most far-

Corazon Aquino's government,

tion, will redistribute 9.7 million hectares (24 million acres) of land to the country's 3 million landless peace," he said.

Analysts say these farmers have provided ready recruits and ympathisers for the Communists. Previous land reform programmes have been limited to corn and rice lands and have fallen far short of expectations.

The president herself desires that the constitutional mandate to place all agricultural land under Agrarian reform should be carried out to completion within her term of office," Mr. Alvarez said. The new charter, officially ranfied Saturday, will keep Mrs. Aquino in office until 1992.

Meanwhile Mrs. Aquino's government pledged to continue to work for peace after a 60-day ceasefire with Communist rebels Chief government negotiator Teofisto Guingona said he was sorry the rebels had refused to agree to an extension of the

lowing a series of stinging election defeats. "I can bring some fresh air to the party," Hernandez Mancha

told the congress. AP was the main party of a three-member coalition that fell apart after the right lost last June's general election to the

ruling Socialists. It was the second consecutive election defeat to the party of Prime Minister Felipe Gonzalez

MADRID (R) — Spain's main since the Socialists came to power opposition Alianza Popular (AP) in 1982. Mr. Gonzalez won an in 1982. Mr. Gonzalez won an absolute majority in parliament in both elections.

Like Mr. Gonzalez, Hernandez Mancha is a native of the southern region of Andalucia, an economically backward region that bas rarely produced a national political leader.

Hernandez Mancha, who had his first taste of national politics eight months ago when elected to the low-key senate, pledged to make the right-wing's ideas more

"We do not have to apologise every day for belonging to AP," he said. "Our party will be the core not only of the centre-right, but of the whole opposition.

Supporters said Mr. Hernandez Mancha would give the party a modern image and his personal charm could boost the right's voter appeal.

Politicians said the new party leader would face the daunting task of healing divisions by next June's municipal and regional

### Democrats say Reagan 'seems dangerously disengaged' "Americans cannot afford a

WASHINGTON (AP) - House Majority Whip Tony Coelho said Saturday that President Ronald Reagan "seems dangerously disengaged" and invited him to "come off the sidelines" and join the Democratic-controlled Congress in addressing the nation's problems.

"As we enter the president's final two years, the signals from the White House are not good. ... Most of his top staff is quitting and Mr. Reagan himself seems dangerously disengaged from the business of governing," Mr. Coelho said in the weekly Democratic radio address.

"We don't have all the answers, hut at least we're addressing the challenges that lie ahead," he said, referring to Congress. "But the country can't be led by Congress alone.

succeed if the White House sleep walks through the next two years," he said. "Our compentors around the world, both economic and military, might try to take advantage. Republicans and Democrats want a strong presidency and the country needs Mr. Coelho urged Mr. Reagan

passive presidency. We cannot

to move quickly toward an armscontrol agreement with the Soviet Union and work with Congress to enact trade legislation.

"The Democrats in Congress pledge cooperation. We want the president to come off the sidelines and join us on the playing field. The issues are ton important and the opportunities too great," he said.

### **Cosmonauts dock with Mir** Soyuz TM-2 has spent two days

MOSCOW (R) - Two Soviet cosmonauts aboard a new-generation Soyuz spacecraft docked Sanday with the orbiting space station Mir, the Soviet news agency TASS said. It said the experiment, hilled as

the first automatic docking with the space station, was completed at 2.28 a.m. (2328 GMT Saturday).

The agency said cosmonauts Yuri Romanenko and Alexander "Practically the next day, the Laveikin were in good health but Shah was on a plane out of the details of the manoeuvre. The Soyuz TM-2 craft was

launched last Friday and is the first in a new series of vehicles to take cosmonauts into space. An unmanned prototype of the Soyuz TM series was successfully tested last May.

In contrast to the older Soyuz T models, which had to be docked manually with the assistance of cosmonauts, the new generation of spacecraft is designed for automatie docking with orbiting plat-

approaching Mir instead of the usual one day. The official news agency TASS said this schedule enabled Soyuz TM-2 to save fuel during the delicate link-up with After docking, one of the first

tasks of the cosmonauts will be to unload food and other provisions from the Progress-27 tanker-transport vehicle, launched last January 16 and docked with Mir two days later. During their mission, which

Western specialists expect will last a record 290 days or so, a module for astrophysical experi-ments will be launched to hook up with Mir. It will be the first such module to be attached to the

Mir, which was sent up in Fehruary last year, has six dockung ports for specialised modules. When it is fully operational, it is planed to be a giant, permanently-manned orbiting space labora-

## Sakharovs thank Gorbachev for freeing jailed dissidents

MOSCOW (R) — Soviet dissident Andrei Sakharov and his wife Yelena, expressing thanks to Kremlin leader Mikhail Gorhachev, have said 42 political dissenters were freed in the last week from prison, labour camp and exile.

"I hope that this is only a beginning and that soon all pris-oners of conscience will be freed," Mrs. Sakharov told reporters in Moscow Saturday. "It is a wonderful turnaround... We are very grateful to Gorbachev

Mrs. Sakharov, also known by

her maiden name Bonner, said she and her husband had compiled their list on the basis of telephone calls and telegrams from the freed prisoners or their families and friends.

All the released prisoners have been given a document by labour camp or prison authorities saying they had been pardoned by a decree of the Presidium of the Supreme Soviet, she said. The official Soviet Press has

not published the decree and the authorities have given no word on how many prisoners might be

## COLUMNS 768

### Pet food spoon wins contest

WASHINGTON (AP) — A 6-year-old Oklahoma girl has come up with a solution to a problem that has vexed some pet owners for years: How to feed a cat or dog without having to wash the messy spoon afterward. Suzanna Goodin's solution is to shape a pet cracker into an edible spoon that can be broken up into the pet's food after serving. Her "edible pet food server" carried off a grand prize Saturday in an invention contest sponsored by the Weekly Reader School Publication. The Weekly Reader said more than 200,000 children participated in its contest. Suzanna, a first-grader, was cited for the best idea submitted by children in kindergarten through fourth grades. Matthew Peters, 13, a seventh-grader from Nashua, New Hampshire, won the grand prize in grades five through 12 for inventing a scooter-like device for coasting on ice or pavement. Both children received \$500 U.S. Savings Bonds and were being feted at the National Inventors Expo this weekend in the nation's capital.

### Days of the tomato' celebrated

OUAGADOUGOU, Burkina Faso (AP) — Feh. 6 and 7 have been declared "days of the tomato" in this West African country in a move to increase the use of 30,000 tonnes of tomatoes produced each year. The government and the United Nations Food and Agriculture Organisation (FAO) coordinated the nationwide project to demonstrate methods of preparation and conservation in Burkina Faso, one of the world's poorest countries. "The simple methods we are using can be applied in the poorest of villages," food educator Henriette Kabore said. People can onw have tomatoes in some form year-round instead of only five months as before." In Ouagadougou, the capital city, crowds thronged past stalls in a specially created marketplace. Housewives, off-duty soldiers and schoolchildren tasted sample dishes and took away copies of recipes which use tomato products.

### 2 men break record in jumping rope

JOHNSTOWN, Pennsylvania (AP) - Two men who had set world records jumping rope challenged each other to a jump-off, but they stopped at the same time when they set what they claimed as a new record: More than 13 hours of continuous hopping. "I'm looking for a spare set off feet," said Bob Commers, 36, of Johnstown, who had two heart attacks and a stroke before having open heart surgery six years ago. Commers and Randy Schneider, 29, of Janesville, Wisconsin, jumped side-hy-side for 13 hours, 15 minutes and 47 seconds at an American Heart Association fund-raiser in Johnstown. The two said they broke a record set in October of 13 hours, 12 minutes and 11 seconds. Each man had set previous records of more than 12 hours. Schneider said the two decided to quit together if they beat the old record. "We pushed each other to the record," he said. "We really didn't agree to finish together until the 13th hour." Commers, who used to weigh 131 kilogrammes, said he turned to jumping rope in order to lose weight and improve his health. He now weighs 71 kilogrammes, he said.

### Hemingway novel gets mixed reception

LONDON (AP) - Some big gans were summoned by Britain's Sunday newspapers to review Ernest Hemingway's posthumously published novel, the Garden of Eden. The reception was mixed. The story concerns the honeymoon of a young American couple in France in the 1920s. The honeymoon is wrecked by the bride who, jealous of her busband's writing success, turns to an affair with another woman, who eventually goes off with the husband. Playwright Tom Stoppard said in the observer: "It is in many places and in several respects the equal to his best work, and if it fails as a whole to control its aim and its halance perhaps it is because it became overtaken by events." The poet Stephen Spender in the Sunday Telegraph says Hemingway, by making the wife mad, fatally weakened his novel, by acquitting the husband and the other woman "of moral responsibility for their actions." Spender said despite the flaw, the novel is "very revealing as a thinly veiled antobiography," as Hemingway "left his first wife Hadley for Pauline Pfeiffer and then, after an interval in which the three of them were much together, went off with Pauline." "It is no great shakes," was the verdict of columnist Bernard Levin in the Sunday Times. Graham Lord, the regular reviewer of the Sunday Express and himself a novelist, said in the Sunday Express: "The book is a vivid and painful description of paradise corrupted, innocence tainted and happiness lost: Of how a writer can be destroyed hy a pushy woman hut can use his fiction to escape his problems. But it's all a bit silly, repetitive and unbelievable."

### Gromyko tours Moscow shops

MOSCOW (R) — Soviet President Andrei Gromyko, oldest member of the Kremlin leadership, toured Moscow supermarkets and heard complaints from shoppers about shortages and poor quality goods last week, Pravda said. Foreign analysts said it was only the second time Mr. Gromyko, who served as foreign minister for 28 years and has been a member of the Communist Party's ruling politburo for almost 14, had been reported on a "meet the people" excursion at home. Over the past two years Kremlin leader Mikhail Gorbachev, his Prime Minister Nikolai Ryzhkov and Moscow Party Chief Boris Yeltsin, a reformer close to Mr. Gorbachev, have all been on walkabouts in the capital and the provinces. But Mr. Gorbachev himself has implicitly criticised officials who surrounded the late president and party chief Leonid Brezhnev for cutting themselves off from the people and failing to recognise the problems of everyday

## Soldiers with AIDS to be discharged

ROME (AP) - Italian soldiers will be tested for AIDS and those found to be carrying the virus will be discharged, the Defence Ministry announced. The measure is part of an AIDS prevention and Education Programme in the military called for by Defence Minister Giovanni Spadolini that also includes the free distribution of condoms, issuing pamphlets and holding seminars about the disease. Soldiers are to undergo medical examinations every 15 days that will include tests to detect the acquired immune deficiency syndrome (AIDS) virus, the

## Aquino, Waite receive awards

NEW YORK (AP) — Philippine President Corazon Aquino and Terry Waite, special envoy of the Archbishop of Canterbury, have been honoured for their efforts to promote change through peaceful means. Mrs. Aquino was given the Society of the Family of Man's Golden Medallion Award for "encouraging the fullest democratic participation of all Filipinos, for seeking peace through political and economic change and through negotiation." Mr. Waite, who dropped out of sight in Beirut last month, received the award for his "success, in the face of long odds, in gaining the release of hostages held captive in Lebanon." Mrs. Aquino accepted the award in her Manila office, addressing the approximately 1,000 people gathered at Manhattan's Hotel Pierre via a live television transmission. The Rev. Charles A. Cesaretti, deputy for Anglican relations for the Episcopal Church in the United States and a longtime friend of Mr. Waite's, accepted the award. "No one could replace Terry Waite on the platform, and indeed, anything I could say here would be inadequate other than to recall what he's doing at this moment," Cesaretti said.

#### Dole blasts Nunn warning on SDI ing would be banned under the WASHINGTON (AP) — Senate Republican leader Boh Dole has Meanwhile in Moscow the current interpretation, which is Soviet Communist Party news-
